

# Contents

<b>1</b>	<b>Introduction</b>	<b>2</b>
1.1	Robot components . . . . .	2
1.2	A robot movement model: Random walk . . . . .	3
1.3	Problem statement . . . . .	4
1.4	Organization of the thesis and our contribution . . . . .	4
<b>2</b>	<b>Swarm robotics</b>	<b>5</b>
2.1	Basic issues in swarm robotics . . . . .	5
2.2	Classification of swarm robot . . . . .	6
2.3	Robotic models . . . . .	7
2.3.1	Probabilistic model . . . . .	7
2.3.2	Chain based models . . . . .	8
2.3.3	Some other models . . . . .	8
2.4	Distributed swarm robotic system . . . . .	9
<b>3</b>	<b>Popular fault tolerance techniques</b>	<b>11</b>
3.1	ALLIANCE . . . . .	11
3.2	Fireflies used in fault tolerance . . . . .	12
3.3	SAFDetection . . . . .	14
3.4	LeaF . . . . .	16
<b>4</b>	<b>Fault tolerance using faulty robot status</b>	<b>19</b>
4.0.1	Movements . . . . .	20
4.0.2	State diagram . . . . .	20
4.1	Resolving fault . . . . .	22
4.2	Swarm size . . . . .	23
4.3	Experiment . . . . .	23
<b>5</b>	<b>Conclusion</b>	<b>26</b>
5.1	Scope . . . . .	26
5.2	Future extension of the work . . . . .	26
