

Table of Contents

1. Introduction	2
1.1 Overview on some biological concept	2
1.1.1 What is Genome?	2
1.1.2 DNA and its Structure	2
1.1.3 What is parity?	3
1.1.4 What is Intra-Strand parity (ISP)?	3
1.2 Overview on Project Objective	3
2. Estimation of Intra-Strand Parity	7
2.1 Study of parity significances in intra-strand parity	7
2.1.1 Algorithm for ISFDP	8
2.1.2 Result	9
2.1.3 Summary of ISFDP	11
2.2 Calculation of deviation from Intra Strand Parity	11
3. Theory to explain Intra-Strand Parity	13
3.1 RNA secondary structure for finding of stem-loop structures	14
3.2 Dynamic programming method to find Steam-loop structure	15
3.3 Dynamic Programming algorithm for finding stems loop structure	16
3.4 Types of different regions in RNA secondary structure	20
3.5 Results	22
3.6 Discussion	25
4. Conclusions and Future work	27
5. References	29
