ACKNOWLEDGEMENT

As part of our MCA curriculum I have been assigned to do my project work in National Informatics Center (NIC), Guwahati. I am very pleased to acknowledge the help and co-operation received from different person in connection with my project work titled "MIS for Office of Registrar of Firms and Societies (MIS-ReFiS)". First I would like to take the opportunity to express my deep gratitude to all our teachers for their valuable suggestion, References and encouragement from time to time in spite of their busy schedule.

At very outset I acknowledge most sincerely and respectfully my heartiest thanks and gratitude to Mrs. Hiramani Goswami, Head and Technical Direction, National Informatics Center, Training Division, Assam for giving me the opportunity to undertake this project at NIC and also for her immense help in all respects.

I express my sincere and heartfelt gratitude to my organizational guide Mr. Gautam Choudhury, Scientist-D, NIC, Guwahati for his guidance and valuable suggestions during the project period and being very friendly.

I also express my gratitude towards Mr. Deepak Goswami, SIO, NIC, Assam State Unit for his timely support and valuable suggestion during the project period.

I pay my gratitude to all my co-trainees and other staff of the NIC training division who were so supportive and made the atmosphere friendly to work.

I again say my sincere thanks to all of you.

With regards

Sabita Dev.

PREFACE

Excellence is an attitude that the whole of the human race is born with. It is the environment that makes sure that whether the result of this attitude is visible or otherwise. The well planned, properly executed and evaluated industrial training help a lot in including the good work culture. It provides linkage between the student and industry in order to develop the awareness of industrial approach to problem solving based on broad understanding of process and mode of operation of an organization.

During this period, the students get their real first hand experience on working in the actual environment. Most of the theoretical knowledge that they have gained during the course of their studies is to put to test here. Apart from this the students get the opportunity to learn the latest technology, which immensely help them in their career. This also benefits the organization as many students doing their projects perform very well.

I had the opportunity to have the real practical experience, which has increased my sphere of knowledge to a great extent. Now I am better equipped to handle the real thing than anyone else that has not undergone any such training. During the training period, I learned how an actual project progresses, what sort of problems actually occur during the development of such big projects, how to produce quality products etc.
