# ABSTRACT

The Online Application Portal for Tezpur University Entrance Examination is a web-based application system, which is proposed to further enhance the present existing Application Portal for Tezpur University Entrance Examination (TUEE). The Main Objective of this Application is to reduce and ease the applying process by the candidate for TUEE. This system is designed to help both Users and Administrator.

With the help of the proposed system, a candidate can apply for more than one program offered by the University using the same USER-ID which is required for accessing the portal. Due to web-based features, any applicant who is Indian or foreign national can access and apply at Tezpur University at anytime from anywhere. After providing basic personal and academic information of the candidate in the portal successfully, a Challan will be generated and he/she have to download the Challan and pay the required fee in any branch of the SBI. Once the Applicant pay the fee, he/she need to specify the Journal No. in the portal and after that a print copy of the complete application form and University copy of the paid Challan must send to Tezpur University for further processing. The designated person from TUEE Cell will verify the Application form received, and after scrutiny, the form is approved or rejected. As soon as the Application form is approved by the Admin, the Admit card can be downloaded by the applicant at any time on or before date of Entrance Exam.

At the Administrator side, an Admin can search for various information at Department and Programme level. It also helps to get different statistics of the candidates. List of eligible candidates for different Programmes at a particular center can be downloaded by an Admin, which is useful while conducting the Entrance Exam.

Here we have tried to reduce some of the flows, which exist in present Tezpur University Entrance Examination (TUEE). This system reduces time and effort for both User and Admin.
