

## **ABSTRACT**

The aim of the project is to develop an Online Course Registration System of Tezpur University, which facilitates the students to register their courses online in a convenient way through a user –friendly interface. The Online Course Registration System allows students to register, withdraw or add courses within the registration period. It also provides the facility to the course advisor and HoD to approve/reject the courses registered by the student. It also provides the administrative authorities with an interactive mechanism to manage the whole course registration process with utmost accuracy and efficiency. Thus reducing the probability of error and manual workload.
