CHAPTER 1

1. Introduction.....	1
1.1 Challenges.....	2
1.2 Different Aspect of an Outlier Detection Problem.....	3
1.2.1 Nature of Input Data	
1.3 Type of outliers.....	4
1.3.1 Point outlier	
1.3.2 Contextual outliers.	
1.3.2(a) Contextual attributes.	
1.3.2(b) Behavioral attributes	
1.3.3 Collective outliers	
1.4 Data labels.....	5
1.4.1 Supervised outlier detection.	
1.4.2 Semi-supervised outlier detection.	
1.4.3 Un-supervised outlier detection.	
1.5 Output of outlier Detection	7
1.5.1 Scores	
1.5.2 Labels	
1.6 Application of Outlier Detection.....	7
1.6.1 Intrusion detection	
1.6.1.1 Host Based Intrusion Detection Systems.	
1.6.1.2 Network Intrusion Detection Systems.	
1.6.2 Fraud Detection	
1.6.2.1 Credit Card Fraud Detection.	
1.6.2.2 Mobile Phone Fraud Detection.	
1.6.2.3 Insurance Claim Fraud Detection.	
1.7 Classification Based Outlier Detection Techniques.....	9
1.8 Aim of the work.....	10
1.9 Organization of the report.....	10

CHAPTER 2

2. Proximity and some basic notation	11
2.1 Proximity measurement for Spatial Database.....	11
2.1.1 Euclidean distance	
2.1.2 Metrics property	
2.2 Some Notation	12
2.2.1 Eps-neighborhood of a point p	
2.2.2 k -neighborhood of a point p	
2.3 Efficient Determination of Eps-Neighborhoods	13

CHAPTER 3

Survey on outlier Detection.....	14
3. Nearest Neighbor Based Detection Techniques.....	14
3.1 Distance based Outlier Detection	15
3.2 Density-based Outlier detection approach	16
3.2.1 LOF (Local Outlier Factor).....	16
3.2.1(a) (k -distance of an object p):	
3.2.1(b) (k -distance neighborhood of an object p):	
3.2.1(c) (Reach-ability distance of an object p w.r.t. object o):	
3.2.2 (Local reach-ability density of an object p):	
3.2.3 (Local outlier factor of an object p)	
3.3 VA-file.....	21

CHAPTER 4

4. Related work.....	23
4.1 Methods for finding nearest-neighbor and its problem.....	24
4.1.1 Basic k -nearest neighbor Algorithm	
4.1.2 Nearest Neighbor algorithm by using Triangle Inequality	
4.1.3 Comparison between conventional k -neighborhood and TI k -neighborhood
