

TABLE OF CONTENTS

CHAPTER (Topics)	page no
CHAPTER 1.	
1.1 Introduction	1
1.2 Related works	2
1.3 Analysis of usage and application logs from a business SaaS data center	4
1.4 The framework for the cloud controller	5
1.5 SLA violation predictor	6
1.6 Workload management	8
1.7 Modeling failures and remedial action taken against	12
CHAPTER 2.	
2.1 Workload analysis for collocation compatibility	14
2.2 Motivations for checking compatibility	14
2.3 Algorithm for collocation and compatibility	17
2.4 Workload characteristics	20
2.5 Analysis	22
CHAPTER 3.	
3.1 Capacity estimation without apriori knowledge of workload	25
3.2 Proposed approach	26
3.3 Algorithm	29
3.4 Empirical study	31
CHAPTER 4.	
4.1 Conclusion and future work.....	33
References	34

LIST OF FIGURES

FIGURE NO	FIGURE NAME	Page no
FIG 1	Control flow of the proposed framework.....	5
FIG 2	Workloads Peaking at Different Time Intervals.....	15
FIG 3	Resource Utilizations of two Workloads from a Data Center.....	16
FIG 4	Overview of the proposed approach.....	17
FIG 5	Perfectly non-overlapping workloads.....	26
FIG 6	Sharing using 90 th percentile.....	27
FIG 7	Optimally determined sharing point.....	28

LIST OF TABLES

TABLE NO	TABLE NAME	Page no
TABLE 1	Distribution Information table.....	1
TABLE 2	Workload summary.....	21
TABLE 3	Workload summary 2.....	21
TABLE 4	Collocation Compatibility Matrix.....	23
TABLE 5	Capacity estimation by algorithm 3.....	24
TABLE 6	High level view of the workload.....	31
TABLE 7	TCM and PCM.....	32
TABLE 8	Workload Consolidation.....	32
