

Contents

| Chapter | Page |
|--|------|
| Chapter 1- Introduction and Problem Definition | 1 |
| Chapter 2- Background | 5 |
| 2.1 Overview of internet worm | 5 |
| 2.2 Various signature generation Schemes | 7 |
| Chapter 3- Analysis of Different Type of Vulnerabilities | 9 |
| 3.1 What is Vulnerability | 9 |
| 3.2 Types of Vulnerability | 9 |
| 3.3 Buffer Overflow Vulnerabilities | 10 |
| 3.4 Stack Overflow Vulnerabilities | 10 |
| 3.5 Heap Buffer Overflow | 15 |
| 3.6 Integer Overflow | 17 |
| Chapter 4- The proposed System | 19 |
| 4.1 The Vulnerability Signature Generator | 21 |
| 4.2 The Signature Generation Process | 22 |
| 4.3 The modules | 23 |
| 4.4 Protocol Variable to Path Variable Mapping | 26 |
| Chapter 5- Protocol Variable to Path Variable Mapping | 27 |
| 5.1 Protocol Variable to Path Variable Mapping Point | 27 |
| 5.2 Protocol Variables and Path Variables | 28 |
| 5.3 Our Approach | 33 |
| Chapter 6- Implementation | 35 |
| 6.1 Windows | 35 |
| 6.2 Linux | 38 |
| 6.3 Sample Output | 39 |
| Chapter 7- Conclusion and Future Work | 41 |
| References | 42 |
