

Acknowledgement

The ability to help and patience to exercise diligence and provide support is a quality admonished by very few. Any jobs in this world, however trivial or tough cannot be accomplished without the assistance of the others. I would hereby take the opportunity to express my indebtedness to people who have helped me to accomplish this task. The present line of accomplishment is not a formality but an honest word of appreciation that has exactly been felt by during my project.

First, I would like to thank *Mr. Deepak Goswami*, SIO, National Informatics Centre, Assam State Centre, for providing unwavering support and the opportunity to work in this organization.

I take immense pleasure in thanking my Project Guide, *Mr. Tassiruddin Ahmed, Scientist-E*, National Informatics Centre, Assam State Centre, for providing unwavering support and help.

I convey my sincere thanks to *Prof. Nityananda Sarma, Department of CSE, Tezpur University* for the help in getting my project.

I also take this opportunity to express our indebtedness to our respected parents and all our respected teachers of *Tezpur University, Assam* for their kind consent, expert guidance, valuable suggestions and affectionate encouragement. I also express my deep appreciation to all my classmates and friends for their most cordial and helpful role during the entire work period.

Preface

Excellence is an attitude that the whole of the human race is born with. It is the environment that makes sure that whatever the result of this attitude is visible or otherwise. The well planned, properly executed and evaluated industrial training helps a lot in including the good work culture. It provides linkage between the student and industry in order to develop the awareness of industrial approach to problem solving based on broad understanding of process and mode of operation of an organization.

During this period, the students get their real firsthand experience on working in the actual environment. Most of the theoretical knowledge that they have gained during the course of their studies is to put to test here. Apart from this the students get the opportunity to learn the latest technology, which immensely help them in their career. This also benefits the organization as many students doing their projects perform very well.

I had the opportunity to have the real practical experience, which has increased my sphere of knowledge to a great extent. Now, I am better equipped to handle the real thing that anyone else that has not undergone any such training. During the training period, I learned how an actual project progresses, what sort of problems actually occur during the development of such big projects, how to produce quality products and so on. I also learned how to share ones knowledge to bring out a cumulative effect, how to solve problem in modular way. I learned the strategy of divide and conquer with application level approach and methodical cycle of software development. And being in such a reputed organization, I had given the best exposure.
