

TABLE OF CONTENT

List of Figures, Tables & Graphs

CHAPTER 1: INTRODUCTION

1.1 Introduction on Speech Emotion Recognition.....

1.2 Objective

CHAPTER 2: SPEECH SIGNAL PRODUCTION & SPEECH EMOTION RECOGNITION (SER)

2.1 Voiced & Unvoiced Speech.....

2.2 Noise and Silence Region removal.....

2.2 Speech emotion Recognition.....

2.3 Nature of Emotion in speech.....

 2.3.1 Describing Emotion

2.4 Automatic SER.....

 2.4.1 Emotion speech Data

 2.4.2 Berlin Database

CHAPTER 3: SUPPORT VECTOR MACHINE (SVM)

3.1 Support vector Machine.....

 3.1.1 SVM Classification

3.2 Linear SVM.....

3.2.1 Feature of Linear SVM

3.3 Kernel Function for machine learning.....

 3.3.1 Some Kernel function

3.4 Fundamental Frequency of human voice.....

CHAPTER 4: SER- SPEECH EMOTION RECOGNITION SYSTEM

4.1. Feature Labeling & Feature Selection

4.2 Feature Extraction & methodology.....

 4.2.1 End point Detection

4.3 Several Basic Speech attributes for the feature extraction.....

 4.3.1 Pitch detection algorithm

 4.3.1.1 Cepstrum Technique

 4.3.2 Log Energy

 4.3.3 Formant

 4.3.4 Zero- Crossing rate

 4.3.5 Mel Energy Spectrum Dynamic Coefficient (MEDC)

 4.3.6 Mel Frequency Cepstrum Coefficient (MFCC).....

 4.3.6.1 Preprocessing

 4.3.6.2 Framing

 4.3.6.3 Hamming Windowing

 4.3.6.4 Fast Fourier transforms (FFT)

 4.3.6.5 Mel Filter Bank

4.3.6.6 Logarithm

4.3.6.7 Discrete cosine transforms (DCT)

4.4 SVM Classifier.....

CHAPTER 5: EXPERIMENTS AND RESULTS.

5.1 Data Collection.....

5.2 Implementation of algorithm.....

5.4 Result and its Accuracy.....

CONCLUSION.....

REFERENCE.....

LIST OF FIGURES, TABLES & GRAPHS

Figure 2.1(a):- Block diagram representation of voiced speech production.

Figure 2.1(b):- Signal representation of voiced speech production.

Figure 2.2(c):- Block diagram representation of unvoiced speech production.

Figure 2.2(d):- Signal representation of unvoiced speech production.

Figure 2.3:- The 2-D activation evaluation emotion space, with the approximate positions of some categorical descriptors shown in the plane.

Figure 3.1:- Data separation using hyperplanes.

Figure 3.2:- Linearly separable of data.

Figure 3.3:- non- linearly separation of data.

Figure 4.1:- Block Diagram of Speech Emotion Recognition System using SVM Classification.

Figure 4.2:- Different types of SER feature extraction.

Figure 4.3:- Speech Signal Before End point Detection.

Figure 4.4:- Speech Signal After End point Detection.

Figure 4.5:- Pitch detection based on cepstrum.

Figure 4.6:- Log Energy Value.

Figure 4.7:- Block diagram of MEDC feature extraction.

Figure 4.8:- Block diagram of MFCC feature extraction.

Figure 4.9:- The hamming window of a speech signal.

Figure 4.10:- Mel scale filter bank of a speech signal.

Figure 5.1:- Original waveform signal for Anger (Training Data set).

Figure 5.2:- Noise Removal waveform signal for Anger (Training Data set).

Figure 5.3:- Silence region Removal waveform signal for Anger (Training Data set).

Figure 5.4:- Original waveform signal for Anger (Testing Data set).

Figure 5.5:- Noise Removal waveform signal for Anger (Testing Data set).

Figure 5.6:- Silence region Removal waveform signal for Anger (Testing Data set).
