

Table of contents

1. Introduction:	1
1.1 Motivation	2
1.2 Problem statement	3
1.3 Outline of the thesis	3
2. Literature survey and background knowledge	4
2.1 Supervised Learning	4
2.2 Unsupervised Learning	4
2.3 Semi-supervised Learning	5
2.4 Multi-layer Perceptron	5
2.5 Change Detection semi-supervised MLP	7
3. Proposed Change Detection Technique	10
3.1 Architecture of the Proposed Technique	10
3.2 Generation of Input Patterns	11
3.3 Generation of Labeled Patterns	13
3.4 Classification using histogram thresholding	14
4. Prototype Implementation	18
4.1 Description of the Dataset	18
4.2 Experiment Using Band 4 Image Only	20
4.3 Experiment Using Band 5 Image Only	20
4.4 Experiment Using Band 4 and Band 5 Images	20
4.5 Reference Image	20
5. Analysis of Result	21
5.1 Result obtained using band 4 images only	21
5.2 Result obtained using band 5 images only	22
5.3 Result obtained using band 4 and band 5 images	23
5.4 Comparative study of the results	24
6. Conclusion	26
7. Reference	27

List of Figures:

	page no.
1. Figure 1. Architecture of the MLP used to solve change-detection problem	6
2. Figure 2. Schematic diagram of the proposed technique	11
3. Figure 3. A pixel with its eight neighbors (2 nd degree neighborhood)	12
4. Figure 4. A pixel with four neighbors	12
5. Figure 5. Labeled and unlabeled patterns presented in two-dimensional feature space.	13
6. Figure 6. The generated histogram of the distance values	14
7. Figure 7. Curve generated by connecting the histograms	15
8. Figure 8. Curves drawn to obtain an optimum threshold	16
9. Figure 9. Optimum threshold(t_1) obtained by the proposed method	17
10. Figure 10.(a) Image of Mexico area Band 4 of the Landsat ETM+ image acquired in April 2000	18
11. Figure 10.(b) Image of Mexico Area Band 5 of the Landsat ETM+ image acquired in April 2000	18
12. Figure 10.(c) Image of Mexico area Band 4 of the Landsat ETM+ image acquired in May 2002	19
13. Figure 10.(d) Image of Mexico area Band 5 of the Landsat ETM+ image acquired in May 2002	19
14. Figure 10.(e) Difference image obtained by the CVA technique	19
15. Figure 10.(f) Reference map of the changed area.	19
16. Figure 11(a). The result image obtained using band 4 images using two features	21
17. Figure 11(b). The result image obtained using band 4 images using nine features	21
18. Figure 12(a). The result image obtained using band 5 images using two features	22
19. Figure 12(b). The result image obtained using band 5 images using nine features	22
20. Figure 13(a). The result image obtained using band 4 and band 5 images using two features	23
21. Figure 13.(b) The result image obtained using band 4 and band 5 images using nine features	23

List of Tables:

page no.

1. Table 1. Overall errors, missed alarms and false alarms produced by MTET, k-MEAN, EM+MRF, MLP and proposed technique on band 4 images 24
2. Table 2. Overall errors, missed alarms and false alarms produced by MTETk-MEAN, EM+MRF, MLP and proposed technique on band4 and band5 images 25
