ACKNOWLEDGEMENT

I thank my Lord with all my heart and being. I have relied on his grace, constant encouragement and on his unending love throughout this work and my time in this University. It is to him that I humbly dedicate this work.

At the very inception I would like to take the privilege to thank Mr. Deepak Goswami, Senior Technical director, National Informatics Centre, Guwahati and all the staff of NIC who have helped me to undergo the project work in this Organization of repute.

I express my sincere and heartfelt gratitude to the Director and all the staff of Food, Civil Supplies and Consumer Affairs, Govt. of Assam and who has provided the all information's and invaluable guidance in under taking this project. This project would not have been possible without their kind support.

I am extremely grateful to Mr. Devajit Bhattacharya, Technical Director, National Informatics Center (NIC) who has provided invaluable guidance and help in under taking this challenging project. This project would not have been possible without his kind support. I am greatly indebted for his valuable, constructive and critical guidance during this project work.

PREFACE

Excellence is an attitude that the whole of the human race is born with. It is the environment that makes sure that whether the result of this attitude is visible or otherwise. The well planned, properly executed and evaluated industrial training help a lot in including the good work culture. It provides linkage between the student and industry in order to develop the awareness of industrial approach to problem solving based on broad understanding of process and mode of operation of an organization.

During this period, the students get their real firsthand experience on working in the actual environment. Most of the theoretical knowledge that they have gained during the course of their studies is to put to test here. Apart from this the students get the opportunity to learn the latest technology, which immensely help them in their career. This also benefits the organization as many students doing their projects perform very well.

I had the opportunity to have the real practical experience, which has increased my sphere of knowledge to a great extent. Now I am better equipped to handle the real thing than anyone else that has not undergone any such training. During the training period, I learned how an actual project progresses, what sort of problems actually occur during the development of such big projects, how to produce quality products etc.

Manoj Kumar Kalita 6th Semester, MCA Tezpur University
