

Acknowledgements

It is our great pleasure to show due regards to all the people who have been concerned with the project entitled **A linear time polygonal approximation algorithm for digitized images** undertaken by us.

It would not be possible for us to achieve the success with our effort only. Many people have bestowed upon us their blessings and the heart pledged support. Primarily our heartiest gratitude goes to our project guide **Dr. Arindam Karmakar**, *Asst. Professor of Computer Science Engineering, Tezpur University* for his excellent guidance and valuable suggestion during the course project.

We are also thankful to other faculty members of our department for their suggestions during this project.
