

ABSTRACT

The project is developed for **NUMALIGARH REFINARY MARKETING TERMINAL for Numaligarh Refinery Limited**. It is web based development on Windows Platform. The web server is APACHE Development Server, the database server is MySQL Server (WampServer). For the coding part, PHP is used. JavaScript and JQuery is also used in this project.

The final product has a nice interface, a well-designed database. It is easy to use and maintain.

We did the design, implementation and test all ourself. This report records all the things we did for the project.
