Certificate by the Supervisor	i
Declaration	ii
Acknowledgement	iii
A brief about $d$ -KdV equation and my Project work	1
Aim of the project work	2
<b>CHAPTER :1</b>	
<b>METHOD OF FLUX CONSERVATION</b>	<b>3-37</b>
A brief about method of flux conservation:	4
Conserved densities and Flux of conserved densities of the $d$ -KdV equation	4-37
<i>Conclusion of the method of flux conservation:</i>	37
<b>CHAPTER-II</b>	
<b>METHOD OF POISSON'S BRACKET</b>	<b>38-53</b>
About method of poisons bracket and its properties	39-41
conserved densities and Flux of conserved densities in the method of poisons bracket	42-53

<b>CHAPTER-III</b>	
<b>HAMILTONIAN AND LAGRANGIAN INTERPRETATION</b>	<b>54 - 63</b>
HAMILTONIAN AND LAGRANGIAN form of the d-KdV eqwuation	55- 62
Conclusions	63
Conclusions about my project work	64
Appendices	65
Referrences	67
