

Acknowledgements

I would like to express my extreme sense of gratitude to my supervisor Prof. Charu Lata Mahanta, Dean, School of Engineering, Tezpur University, for her guidance, positive temperament and consistent encouragement throughout the research work. This feat was possible only because of her positive support and best wishes extended to me during the course of investigation and preparation of this manuscript. Your advice on both my career as well as on my personal life has been priceless.

I express my deepest gratitude to my co-supervisor Dr. Manabendra Mandal, Associate Professor, Department of Molecular Biology and Biotechnology, Tezpur University for his enormous co-operation, guidance in planning and executing microbiological experiments and kind discussions and direction during the course of investigation.

I also wish to thank esteemed members of my Doctoral Committee, Prof. S. C Deka, Department of Food Engineering. & Technology, Tezpur University, and Dr. S. K. Ray, Department of Molecular Biology and Biotechnology, Tezpur University, for their precious suggestions at various stages of the investigation.

I owe my profound gratitude and sincere regards to Prof. M. K. Chaudhuri, Hon'ble Vice Chancellor, Tezpur University, for allowing me to pursue my Ph.D. at the University, and for moral appreciation.

I am also thankful to Dr. M. K. Hazarika, Head, Department of Food Engineering and Technology, Tezpur University, and all faculty members of the department for the moral support and necessary help provided to carry out the experimental work.

The doctoral programme would not have come to a successful completion, without the help I received from my colleagues of the Department. They have always extended their support whenever I approached them, and I acknowledge them for their generosity.

Completion of this doctoral dissertation was possible with the support of several people. Faculty members from the other departments of the University have been very kind enough to extend their help at various phases of my research, whenever I approached them, and I do express my gratitude to them.

I express special thanks to all my lab mates and friends for being there whenever I needed them. It is my pleasure to be indebted to various people, who directly or indirectly contributed in the development of this work and who influenced my thinking, behaviour, and acts during course of study.

A special thanks to my family, who supported me in every possible way to see the completion of Doctoral work and longed to see this achievement come true. Your prayer for me was what sustained me this far.

Last but not least, I will remain grateful to Tezpur University for allowing me to pursue my Ph.D. degree.
