<b>TITLE</b>	<b>PAGE NO.</b>
ABSTRACT	i
DECLARATION	iv
CERTIFICATE OF SUPERVISOR	v
PREFACE	vi
ACKNOWLEDGEMENT	vii
LIST OF TABLES	xv
LIST OF FIGURES	xvi
LIST OF ABBREVIATIONS AND SYMBOLS	xix
<b>CHAPTER 1</b>	<b>1</b>
1.1. Introduction	2
1.2. Objectives	4
1.3. Methodologies	8
<b>CHAPTER 2</b>	<b>9</b>
<b>REVIEW OF LITERATURE</b>	
2.1. An overview on cholesterol and cholesterol oxidase	10
2.2. An overview on acetylcholine and acetylcholine esterase	12
2.3. An overview on method for fabrication of cholesterol and acetylcholine field effect transistor (FET)	14
2.4. An overview on electrolyte–insulator interface	15

2.5. Electrochemical cell circuit for electrochemical measurement	16
2.6. Measurement of biomolecules	18
2.7. An overview on enzyme FETs	19
2.8. Working principle of ENFET	20
2.9. An overview on biomolecules immobilization techniques	26
2.9.1. <i>Physical adsorption</i>	26
2.9.2. <i>Entrapment</i>	26
2.9.3. <i>Covalent binding</i>	27
2.9.4. <i>Cross-linking</i>	27
2.10. An overview on cholesterol and acetylcholine ENFET	28
2.11. An overview on nanomaterials	29
2.11.1. <i>CNT and graphene</i>	29
2.12. Conducting polymers	32
2.12.1. <i>Polyaniline and Polypyrrol</i>	32
2.12.2. <i>Potassium and polyethylene imine (PEI)</i>	33
2.12.3. <i>Chitosan</i>	34
2.13. Nano metal oxides	34
2.13.1. <i>Zinc oxide</i>	34
2.13.2. <i>Zirconium dioxide and Hafnium dioxide</i>	35
2.13.3. <i>Nickel oxide</i>	36
2.14. An overview on gravimetric analysis method	37
2.15. Michaelis-Menten constant ( $K_m$ )	37
2.16. Limit of detection	38
2.17. Interference	39
2.18. Regression co-efficient	39

2.19. Aluminum Metallization	40
2.20. Polydimethylsilaxane (PDMS)	42
2.21. Nernst equation	42
2.22. Molarity	43
2.23. Phosphate buffered saline	44
<b>CHAPTER 3</b>	<b>45</b>
<b>Development of a carbon nanotube based bioelectronic device for cholesterol sensing</b>	
3.1. An Overview	46
3.2. Experimental	47
3.2.1. <i>Materials and Chemicals/Reagents</i>	47
3.2.2. <i>Preparation of solutions</i>	47
3.2.3. <i>Fabrication of cholesterol JLCNTFET</i>	47
3.2.4. <i>Theory and working principle of cholesterol JLCNTFET</i>	51
3.3. Results and discussions	52
3.3.1. <i>DC characteristics of JLCNTFET without cholesterol</i>	52
3.3.2. <i>Immobilization of ChOx on PANI/ZnO sensing layer</i>	53
3.3.3. <i>Electrochemical response measuring apparatus for cholesterol detection</i>	53
3.3.4. <i>Electrochemical characterization of cholesterol JLCNTFET</i>	55
3.3.5. <i>Activity of ChOx on cholesterol JLCNTFET</i>	56
3.3.6. <i>Interfacial potential and sensitivity of cholesterol JLCNTFET</i>	57
3.3.7. <i>Limit of detection and regression co-efficient calculation</i>	58
3.3.8. <i>Effect of temperature and pH on cholesterol JLCNTFET</i>	58

3.3.9. <i>Interference and repeatability test</i>	60
3.3.10. <i>Reproducibility and stability test</i>	61
3.4. Summary	63
<b>CHAPTER 4</b>	<b>64</b>
<b>Fabrication and characterization of enzyme modified carbon nanotube based field effect transistor for acetylcholine detection</b>	
4.1. An Overview	65
4.2. Experimental	65
4.2.1. <i>Materials and Chemicals/Reagents</i>	65
4.2.2. <i>Preparation of solutions</i>	66
4.2.3. <i>Fabrication of acetylcholine DG–JLCNTFET</i>	66
4.2.4. <i>Theory and working principle of acetylcholine DG–JLCNTFET</i>	70
4.3. Results and discussions	70
4.3.1. <i>DC characteristics of DG–JLCNTFET without acetylcholine</i>	70
4.3.2. <i>Immobilization of AChE on CH/NiO sensing layer</i>	71
4.3.3. <i>Electrochemical response measuring apparatus for acetylcholine detection</i>	72
4.3.4. <i>Electrochemical characterization of acetylcholine DG–JLCNTFET</i>	73
4.3.5. <i>Activity of AChE on acetylcholine DG–JLCNTFET</i>	74
4.3.6. <i>Interfacial potential and sensitivity of acetylcholine DG–JLCNTFET</i>	75
4.3.7. <i>Limit of detection and regression co-efficient calculation</i>	77
4.3.8. <i>Effect of temperature and pH on acetylcholine DG–JLCNTFET</i>	77
4.3.9. <i>Interference and repeatability test</i>	78

4.3.10. <i>Reproducibility and stability test</i>	80
4.4. Summary	81
<b>CHAPTER 5</b>	<b>82</b>
<b>A comparative study between graphene based and CNT based enzyme modified field effect transistor for cholesterol sensing</b>	
5.1. An Overview	83
5.2. Experimental	83
5.2.1. <i>Materials and Chemicals/Reagents</i>	83
5.2.2. <i>Preparation of solutions</i>	84
5.2.3. <i>Fabrication of graphene based cholesterol FET</i>	84
5.2.4. <i>Theory and working principle of graphene based cholesterol FET</i>	88
5.3. Results and discussions	88
5.3.1. <i>DC characteristics of graphene based FET without cholesterol</i>	88
5.3.2. <i>Immobilization of ChOx on PPy/K/CNT sensing layer</i>	89
5.3.3. <i>Electrochemical response measuring apparatus for cholesterol detection</i>	89
5.3.4. <i>Electrochemical response of cholesterol graphene FET</i>	90
5.3.5. <i>Activity of ChOx on graphene based cholesterol FET</i>	92
5.3.6. <i>Interfacial potential and sensitivity of cholesterol graphene FET</i>	92
5.3.7. <i>Limit of detection and regression co-efficient calculation</i>	93
5.3.8. <i>Effect of temperature and pH of graphene based cholesterol FET</i>	93
5.3.9. <i>Interference and repeatability test</i>	95

5.3.10. <i>Reproducibility and stability test</i>	96
5.4. Summary	98
<b>CHAPTER 6</b>	99
<b>CONCLUSIONS AND SCOPES FOR FUTURE WORK</b>	100
