Abstract	i--iv
Declaration by the candidate	v
Certificate of supervisor	vi
Acknowledgement	vii--viii
Table of contents	ix--xii
List of Schemes	xiii-xiv
List of Figures	xv-xix
List of Tables	xx
CHAPTER 1	
A brief introduction to pyrimidine chemistry: History and importance	1--31
1.1 Introduction & early history	1--3
1.2 Natural abundance	3--6
1.3 Medicinal and biological significances of pyrimidine derivatives	
1.3.1 Treatment of gout	7--9
1.3.2 As adenosine receptor antagonist	9--11
1.3.3 As monamine oxidase B inhibitor	11--13
1.3.4 As antibacterial	13--16
1.3.5 Antiviral agent	16--19
1.3.6 Antitumor and anticancer agent	19--22
1.3.7 Anti-inflammatory agents	22--23
1.4 In material chemistry	23--26
1.5 References	26--31
CHAPTER 2	
A convenient synthesis of novel 5-aryl-pyrido[2,3-<i>d</i>]pyrimidines and screening of their preliminary antibacterial properties	32--55
2.1 Introduction	33--34

TABLE OF CONTENTS

2.2	Results and discussion	34--42
2.3	Conclusion	42
2.4	Experimental section	
2.4.1	General information	43
2.4.2	Screening of 5-aryl-pyrido[2,3- <i>d</i>]pyrimidines towards antibacterial activity	44
2.4.3	Procedure for the synthesis of 6-[1-aza-2-(dimethylamino)prop-1-enyl]-1,3-dimethyluracil	44
2.4.4	General procedure for the synthesis of 5 via Scheme 2	44
2.4.5	General procedure for the synthesis of 5 via Scheme 3	44
2.4.6	General procedure for the reduction of -NO ₂ to -NH ₂ via Scheme 6	45
2.4.7	Spectral data	45--54
2.5	References	55
CHAPTER 3		
A one pot, two-step synthesis of 5-arylpyrrolo[2,3-<i>d</i>]pyrimidines and their preliminary bioassay studies		56--89
3.1	Introduction	57--58
3.2	Results and discussion	58--67
3.3	Conclusion	67--68
3.4	Experimental section	
3.4.1	General information	68
3.4.2	Screening of 5-arylpyrrolo[2,3- <i>d</i>]pyrimidines towards preliminary antibacterial studies	69
3.4.3	Procedure for the synthesis of 6-amino-1,3-dimethylpyrimidine-2,4(1 <i>H</i> ,3 <i>H</i>)-dione	69
3.4.4	General procedure for the synthesis of 4a-k via Scheme 5	69
3.4.5	General procedure for the synthesis of 3a-o via Scheme 5	70
3.4.6	Spectral data	70--88

TABLE OF CONTENTS

3.5	References	88--89
CHAPTER 4		
Ionic liquid catalyzed, microwave assisted synthesis of Pyrido[2,3-<i>d</i>:6,5-<i>d'</i>]dipyrimidine-2,4,6,8-tetraones		90--111
4.1	Introduction	91--92
4.2	Results and discussion	92--98
4.3	Recovery and reusability of [Dsim]Cl	98--99
4.4	Conclusion	99--100
4.5	Experimental section	
4.5.1	General information	100--101
4.5.2	Procedure for the preparation of ionic liquid [Dsim]Cl	101
4.5.3	General procedure for Scheme 3	101
4.5.4	Screening of pyrido[2,3- <i>d</i> :6,5- <i>d'</i>]dipyrimidine-2,4,6,8-tetraones towards preliminary antibacterial studies	101--102
4.5.5	Spectral data	102--110
4.6	References	110--111
CHAPTER 5		
Regioselective iodination at C-5 position of activated pyrimidinediones using KI-VO(acac)₂-H₂O₂-AcOH as iodinating system		112--127
5.1	Introduction	113--114
5.2	Results and discussion	114--117
5.3	Conclusion	117--118
5.4	Experimental section	
5.4.1	General information	119
5.4.2	General procedure for iodination via Scheme 2 & Scheme 3	119
5.4.3	Spectral data	119--125
5.5	References	126--127
