

Contents

1. General Introduction	1
1.1 Regional Frequency Analysis	1
1.2 Background of the Study	2
1.3 Data collection and Study Region	5
1.4 Objective	9
1.5 Organization of the Thesis	9
2. Regional Annual Maximum Rainfall Frequency Analysis of North East India using L-moment.	12
2.1 Introduction	12
2.2 L-moments	12
2.3 Probability Distributions Used for the Study	13
2.3.1 GPA Distribution	13
2.3.2 GEV Distribution	14
2.3.3 GLO Distribution	15
2.3.4 GNO Distribution	16
2.3.5 PE3 Distribution	17
2.4 Index Flood Procedure	18
2.5 Regional Rainfall Frequency Analysis Using L-moment	18
2.5.1 Screening of Data	18
2.5.2 Identification of Homogeneous Region	19
2.5.3 Choice of a Frequency Distribution	20
2.5.4 Estimation of Frequency Distribution	20
2.6 Results and discussion	21
2.7 Development of Regional Rainfall Frequency Relationship	24
2.8 Conclusion	24
3. Regional Annual Maximum Rainfall Frequency Analysis of North East India using LQ-moment	25
3.1 Introduction	25
3.2 LQ-moments	25
3.3 Trimean based parameter estimation of probability distributions	27

3.3.1	GEV Distribution	27
3.3.2	GPA Distribution	28
3.3.3	GLO Distribution	28
3.3.4	GNO Distribution	28
3.3.5	PE3 Distribution	28
3.4	Regional Rainfall Frequency Analysis Using LQ-moment	29
3.4.1	Screening of Data	29
3.4.2	Identification of Homogeneous Region	30
3.4.3	Choice of a Probability Distribution	31
3.4.4	Estimation of Frequency Distribution	33
3.5	Development of Regional Rainfall Frequency Relationship.	34
3.6	Conclusion	34
4.	Regional Annual Maximum Rainfall Frequency Analysis of North East India using LH-moment	36
4.1	Introduction	36
4.2	LH-moment	36
4.3	LH-moments of Probability Distributions	38
4.3.1	GEV Distribution	38
4.3.2	GPA Distribution	39
4.3.3	GLO Distribution	39
4.4	Regional Rainfall Frequency Analysis Using LH-moment	40
4.4.1	Screening of Data	40
4.4.2	Identification of Homogeneous Region	43
4.4.3	Choice of a Probability Distribution	44
4.4.4	Estimation of Frequency Distribution	49
4.5	Development of Regional Rainfall Frequency Relationship	49
4.6	Conclusion	50
5.	Regional Annual Maximum Rainfall Frequency Analysis of North East India Using TL-moment	52
5.1	Introduction	52
5.2	TL-moment	52
5.3	TL-moments of Probability Distribution	53
5.3.1	GPA Distribution	53

5.3.2	GEV Distribution	54
5.3.3	GLO Distribution	54
5.4	Regional Rainfall Frequency Analysis Using TL-moment	55
5.4.1	Screening of Data	55
5.4.2	Identification of Homogeneous Region	56
5.4.3	Choice of a Probability Distribution	57
5.4.4	Estimation of Frequency Distribution	59
5.5	Development of Regional Rainfall Frequency Relationship	59
5.6	Conclusion	60
6.	Comparative Study Among the Parameter Estimation Methods	61
6.1	Introduction	61
6.2	Monte Carlo Simulation	61
6.3	Box plot	62
6.4	Comparison between L-moment and LQ-moment methods	62
6.5	Comparison between L-moment and LH-moment methods	67
6.6	Comparison between LH-moment and TL-moment methods	73
6.7	Comparison between L-moment and TL-moment methods	79
6.8	Comparison between LQ-moment and TL-moment methods	83
6.9	Comparison between LQ-moment and LH moment methods	88
6.10	Conclusion	94
7.	Conclusion	95
8.	Bibliography	98
9.	Appendix	103

List of Tables

Table 2.1: Discordancy measures of each sites of the NE region using L-moments	21
Table 2.2: Heterogeneity measures using L-moments	22
Table 2.3: Z-statistics values of the distributions using L-moments.	22
Table 2.4: Regional parameters of best fitting distribution using L-moments	23
Table 2.5: Quantile estimates by using best fitting distribution	23
Table 3.1: Discordancy measures of each sites of the NE region using LQ-moment	30
Table 3.2: Z-statistics values of the distribution using LQ-moments	32
Table 3.3 Parameters of the best fitting distribution using LQ-moments	33
Table 3.4 Quantile estimates by using best fitting distribution	34
Table 4.1 Coefficients of the relations for different levels of LH-moments	38
Table 4.2 Discordancy measures of each sites of the NE region using L_1 -moments.	41
Table 4.3 Discordancy measures of each sites of the NE region using L_2 -moments.	42
Table 4.4 Discordancy measures of each sites of the NE region using L_3 -moments.	42
Table 4.5 Discordancy measures of each sites of the NE region using L_4 -moments.	43
Table 4.6 Heterogeneity measures using LH-moments (L_1, L_2, L_3 & L_4)	44
Table 4.7 Z-statistics values of the distributions using LH-moments (L_1, L_2, L_3 & L_4)	46
Table 4.8 Regional parameters of best fit distributions using LH-moments (L_1, L_2, L_3 & L_4)	49
Table 4.9 Quantile estimates by using best fitting distributions	49
