

The culmination of this thesis is not the end of my journey but virtually it is an interlude. One cannot be entirely self-made and there are quite a few faces which I have come across during my Ph.D. and had their share of contributions directly or indirectly. I take this opportunity with much pleasure to thank all the people who have helped me through the course of my journey towards completing this thesis. It is a pleasure to convey my gratitude to all of them in my acknowledgment. Even if I miss any name I would like to thank each of them.

First and foremost I would like to articulate my profound sense of gratitude to my supervisors Prof. Alak K. Buragohain and Prof. Nirranjan Chakraborty for their encouragement, importunate attention, scholastic guidance, motivation and direction towards completion of this work, I express my sincere thanks and deepest gratitude to both of them.

I would like to thank Nirranjan sir for considering me as one of his students and believing in me. His motivation, persistent attention and scholastic guidance helped me in all the time of my research work and writing of thesis. I could not have imagined having a better advisor, mentor and above all a teacher from whom I could have learnt this much. I thank him for supporting me scientifically as well as non-scientifically and even sometimes helping me out of the way. His humbleness and down to earth nature had given me the freedom to explore myself. He had supported me despite my wildest of the ideas and never said me no for any experiments, yet he was not sometimes sure about its fecundity. He is one of the best teachers I have and as he said once that a favorite teacher is remembered how he or she made us feel as we learned and had added additional queries in our thinking and learning, and the sense of excitement. I would like to thank him also for inculcating the entire quests and learning procedure during my tenure. A mere acknowledgment cannot limit his contributions to me not only for my Ph.D. tenure but also for my entire life.

On the day of my Ph.D. admission Buragohain sir told me that any time you feel any hassle just call me and so far he has always been with me despite his busy schedule. He is a good teacher but above all he is a very nice person. He was always a best trouble-shooter whenever it was needed. His scientific and scholastic nature is exemplary and inspired me a lot. His unconditional support and encouragement made this rough journey very smooth.

I thank Dr. Subhra Chakraborty, for providing inspiring guidance for the successful completion of my research work.

I am thankful to the vice-chancellor Prof. Mihir Kanti Chaudhuri, Tezpur university, founder Director of NIPGR, Prof. Asis Datta, and present Director Prof. Akhilesh Kumar Tyagi, for providing me the opportunity and making the institute facilities available.

I would also like to convey my sincere thanks to all the Heads of the Department, Department of MBBT Prof. A.K. Mukherjee, Prof. Shashi Barua and Dr. S.K. Ray during my tenure. I would like to offer my special thanks to all the faculty members of the Department of MBBT for their help and support. My sincere thanks are to Prof. Charulata Mahanta and Dr. Robin Doley for their constant motivation and guidance as my doctoral committee member.

Furthermore, I would like to acknowledge Dr. K.K. Hazarika, Dr. N.K. Bordoloi, Mr. P. Mudoi, Mr. S. Kakati and Mr. D. Deka for their constant support.

I would like to thank Department of Food Engineering and Technology, Department of Chemistry and Physics for extending their facilities. My sincere thank is also for ICMR and CSIR for providing me financial assistance from extramural grants.

Thanks are due to all my teachers since my childhood who had taught me and each one had a contribution in molding my personality and knowledge over a period of my lifetime. Thanks would be a very small word to pay my gratitude to my parents. This journey would never have been possible without your love and support. Thanks Maa and Babujee for being in my life. This thesis is actually a little symbol of expectations and sacrifices my father made for the family. He taught me not just the basics and fundamental of science but he is so far my teacher in many aspects. His quest for learning and developing new methodology of teaching always inspire me a lot. His valuable teaching always made me sincere and honest for my work and to relinquish the greediness. My mother always taught me to be humble, patient and grounded.

I am fortunate to have my seniors as Dr. Deepti Gupta, Dr. Arnab Chattopadhyay, Dr. Lalit Agrawal, Dr. Kishwer Jahan, Dr. Aarti Pandey, Dr. Manikant Choudhary, Dr. Dinesh Kumar Jaiswal, Dr. Rajgourab Ghosh, Dr. Ajay Kumar Sharma, Dr. Vinay Kumar Tyagi, Dr. Nasheeman Ashraf, Dr. Mohan Kamthan, Dr. Swagata Ghosh, Dr. Hanumantha Rao, Dr. Deboleena, Pranjan Da, Dr. Nagaraju, Dr. Sumit Ghosh, Dr. Vijay Meli, Dr. Vijay Nalla, Mrs. Deepa, and Dr. Ayushi for making my stay in the institute a memorable one. I would like to acknowledge my association with Uma ma'am, and Sarjeet Da for their support and help.

Though I have had very less opportunities to interact with Arnab da and Dipti di since my entry was almost synchronous with their departure from the lab. Though whenever I had an interaction with Dipti di I found her very enthusiastic for science and I learnt a lot from her. Lalit sir needs special mention since I joined this lab as his trainee and in due course I learnt several skills and techniques from him. His sincere and valuable advices helped me so far. Manikant sir was always found to be a soft spoken and helpful senior. Aarti di not only helped to develop me scientifically with her razor sharp dissection skill to the deepest depth of the topic but also by her critical reading which helped to improve the thesis. Dinesh sir was a very humble senior and friendly too. His scientific advices improved my skills and thought process as well. I will always remember Vinay sir since he taught me the fundamentals of tissue culture and his advices were always an eye-opener to me. My scientific ability and critical thinking was improved by my two seniors Dr. Doel Ray and Dr. Suchitsmita Dass. I learnt to develop a lot of patience from Doel ma'am and she taught me to believe.

I owe my sincere thanks to my lab seniors at Tezpur Dr. Ranjan Datta Kalita and Dr. Nilakshi Barua. I learnt how to work in limited resources from them. They have always stood by me in my ups and downs during my Ph.D. Ranjan da can work selflessly to anybody and I learnt a lot from him especially his management skills. Nilakshi di was an emotional anchor as well as a kind senior to me.

Some of my colleagues deserve a special mention in this section. They have been my constant support both, inside and outside the lab premises. Their words of encouragement as well as their criticism have made me wiser. I am grateful to Pratigya (Madamji) who will be remembered as one of my closest friend. Her intricate discussions have helped me in many ways. In many aspects she deserves a profound respect. Her arrangement and management of lab was exemplary. My sincere thanks are also for Sonika for her scientific discussion especially in lab meetings. Vijay will always be remembered as my younger brother in lab and as one of the most wonderful persons I have known. His scientific advices were always felicitous, ticklish and fruitful. Saurabh, as I know him, is a multitalented guy who not only helped me during the preparation of the thesis but also helped me in scientific as well as nonscientific ways. My heartfelt gratitude to other members of the lab Rajiv, Shaista, Jitendra, Poonam, Navjyoti, Naval, Nuzeeena, Neha, Swarnima, Gargi, Sushmita, Kanika, Priyanka, Yogita, Pooja Agarwal, Pooja Choudhary, Arunima, Pramod, Upendra, Irfan, Anil, Raj Kumar, Protiti, Pratima and Eman. I will always remember Ankj (Ankiteshwar) for his fabulous discussion style, Thiyyarajan and Kamlesh for their innocence and helping me. I am thankful to Nilesh the older not newer member of our lab to wait for me till I finish my work even in late night. I am also thankful to Dr. Papri, Dr. Rajesh Kumar, Dr. Poonam, Dr. Toshiba, and Dr. Harish for their help and support.

Acknowledgement

I am lucky to have three friends Swaraj, Rajul and Sudip. They made my stay at NIPGR a memorable phase of my life. Their constant support, backing and leg pulling made me comfortable in working even in adverse conditions. Of course their scientific inputs had a great impact on my work, I always remember Swaraj for his wittiness, Sudip for his dangerous intelligence and humor and Rajul for his complete personality and perfectness.

My sincere thanks are also for chirping girl, swarkokila, dancing queen, Pragya (Bonli) for her memorable pratah and bye pranam. Her presence always made the surrounding environment lively and helped me in reducing my stress level. My heartfelt gratitude and thanks is also Divya Rathi for helping me to get rid of any unwanted things not only during the writing of the thesis but also during the experimentations. I learnt several things during the troubleshooting of her experiments. Divya Mishra deserves some special words. Her constant support in experiments as well as during the writing of thesis made many things easier to me.

I owe my sincere thanks to Shankar da. I knew him initially as a tough person but later on I realized that he is a person like coconut. He has always been with me like an elder brother. His technical commands on tissue culture techniques helped me a lot. My sincere thanks are also to Jasveerji for not only his helps in computer but for also giving me the example for a grounded and hardworking person. I would like to thank Sujan da and Neeta di for their helps in tissue culture. My sincere thanks are also to Aurbindo da (My mamata banerji) and Ajayji. And one of the most important thanks is awaited to Shri Shri Ravishankar to develop my patience level. I thank the technical staff of the lab, Rajbeer ji, Anand ji, for their support and valuable help in lab work, I express my gratitude to Ashok ji, Sobharam ji, Bishu Da, Mohinder ji, Brijesh, Vasu, Sona tau and Amar for their immense help during the entire course of my research work, I am thankful to some of my friends and seniors Priyanka, Renu, Kamal Sir, Saurabh Sir, Sandhya and Arvind bhai.

My sincere thanks is for my dear friend Lipika who had not only arranged the chemical for me but always with me to solve any problem, though we still fight a lot for seniority. Bhaskar (my dearest katha) have always stood with me unconditionally. He helped me for official proceedings and for the thesis. Yutika, I always remember for her 'pranipad jyestha' and her shopping spree and my bond with her for mahabharat. My sincere thanks is for her to make my T'U life memorable.

My special thanks goes to my hard working seniors and colleagues of MBBT, Susmita di, Sudhir da, Jyoti da, Deboshree di, Pinki di, Krishna di, Pranjal da, Mayur da, Rupamoni Thakur, Anupam Datta, Jitendra bhaiya, Anjan Barman, Neeraj, Saurav Majumdar, Debananda, Tarinee, Manas, Wasim, Pranjal, Saurabh, Diganta, Kaur madam, Sabiha, Kuldeep, Rupesh, Dhruvo, Akash, Rajeev, Monoj and all others to whom I left to mention.

I feel short of words to express my gratitude to my loving brother Navendu (Vinci), Rajesh, Sunny, Rishikesh and sisters Mili, Sima (Buchchan), Rina (Purendis) and Shruti. My sincere thanks are also for new entry Dr. Sujit Mishra. I would also acknowledge my gratitude to Badhiya kaka, Mummy, Chacha, Chachi, Runnu bhajee and Tinu bhajee.

There is no word to convey my thanks to my true and best friend Meenakshi who not only supported and encouraged me selflessly but also helped me to evolve for better. Her scientific inputs and emotional support helped me to come across several barriers.

Sincere thanks to my M.Sc. teachers: Dr. Poornima Kishor, Prof. Nalini Srivastava, Prof. G.B.K.S. Prasad and Prof. Y. K. Jaiswal who always motivated me to work hard.

Let me also thank my friends Amod Gupta, Nidhi and Seema for their love, care and support. I would also like to thank Shailendra, Mukesh, Gyan Bhaskar, Sanjay Pathak, Rachna Shalini, Alpna shalini and special thanks to Deepak Jha, Jaybrata Saha, Sudeep, Rahul and Vivian for all the help over

Acknowledgement

the period. Deepak and Rahul made my Tezpur days always special. I sincerely thank Jaybrata and Deepak for their helps during experimentation and scientific inputs. I owe my sincere thanks for my Ph.D. batch mates Anowar, Anushree and Pem. Anowar (Dr. Husain) deserve some special mention due to his friendly support in and outside the department.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Shubhendu Shekhar
