

Acknowledgements

I would express my sincere thanks to my supervisor, Prof. Ashis K. Mukherjee for his constant inspiration, encouragement and guidance. His expertise, productive discussion and genuine love for science have made this work possible. Most importantly his personal care and love during my stringent days have immensely encouraged me to overcome all obstacles during my Ph.D. curriculum.

I would like to thank Prof. M.K Chaudhari, Vice chancellor, Tezpur University, for his kind support and providing me a positive working environment by constant encouragement during the tenure of my research period.

I would also like to extend my gratitude to the Head of the Department, my Doctoral Committee (DC) members (Dr. S.K. Ray, Dr. M. Mandal and Dr. C. Mahanta), DRC members and other faculties and staff members in the department of MBBT.

I am grateful to Dr. P. Chattopadhyay, DRL, Tezpur for providing me laboratory facility for doing animal experiments and Prof. S.S. Ghosh, IIT, Guwahati for helping me in cell culture studies.

I am grateful to my senior colleague, especially Dr. Sudhir K. Rai, Dr. Debashree Saikia and Dr. Jetendra K. Roy, Mrs. Rupamoni Thakur for their constant encouragement and support. I also express my sincere thanks to my other colleagues in the lab-Bandana, Debananda, Sumita, Bhargab, Pabitra, Taufikul and Biplob for their help in conducting some of the experiments as well as for a productive discussion.

Lastly but most importantly, I am indebted to my beloved mother Mrs. Mira Majumdar and my father late Mr. Sunil K. Majumdar for their blessings and encouragement all throughout my life. After the expiry of my father, my mother is a great source of inspiration for me and without her unconditional support, love, and patience during my stringent days, it was impossible for me to complete this work and submit the thesis on time.

The financial assistance (Junior and Senior Research Fellowship) received from the DBT, New Delhi is duly acknowledged.

Date
