

## LIST OF TABLES

Table 2.1: Fibrinolytic enzyme producing microbes isolated from traditional foods	42
Table 2.2: Fibrinolytic enzymes produced by non-food borne microbes .....	43
Table 2.3: Methods for identification of fibrinolytic enzymes producing bacteria ..	44
Table 2.4: Purification of fibrinogenolytic enzymes from bacterial sources .....	47
Table 2.5: Biochemical properties of microbial fibrinolytic enzymes .....	49
Table 2.6: Various methods of thrombus formation in animal models .....	53
Table 3.1: Optimal PCR reaction conditions for amplification of conserved region of 16S-rRNA gene of selected protease secreting bacterial strains .....	65
Table 4.1: Screening for fibrin(ogen)olytic enzyme producing bacteria from different samples of northeast India.....	92
Table 4.2: Identification of fibrin(ogen)olytic enzyme producing potential bacteria	92
Table 4.3: Biochemical and morphological tests of bacterial strain FF01 .....	94
Table 4.4: Partial DNA sequence of conserved region of 16S rRNA gene of the strain FF01 .....	95
Table 4.5: Homologous search results of 16S rRNA gene partial sequence of strain FF01 using Basic Local Alignment Tool (BLAST) from National Centre Biotechnology Information (NCBI).....	95
Table 4.6: Homologous search results of 16S-23S ISR partial sequence of strain FF01 using Basic Local Alignment Tool (BLAST) tool from National Centre Biotechnology Information (NCBI). .....	98
Table 4.7: Summary of purification of Bacethrombase from <i>Bacillus cereus</i> strain FF01 .....	103
Table 4.8: Amino acids composition of Bacethrombase (% nmol). The analysis procedure has been described in section 3.2.8.3.....	104
Table 4.9: Determination of substrate specificity of Bacethrombase .....	105
Table 4.10: The substrate specificity of Bacethrombase at 37 °C, pH 7.4. ....	110

Table 4.11: Effect of various inhibitors on fibrin(ogen)olytic activity of Bacethrombase.....	112
Table 4.12A: Group mean terminal body weight (g) of control and treated rats for 14 days .....	128
Table 4.12B: Group mean food consumption (g/kg body weight/day) trends for male Wistar albino rats for 14 days. ....	128
Table 4.12C: Group mean water consumption (mL/kg body weight/day) trends Wistar albino rats for 14 days. ....	128
Table 4.12D: A comparison of hematological parameter in Bacethrombase treated and control rat after 14 days of i.v. injection (i.v.) .....	130
Table 4.13: A comparison of some biochemical properties of serum of control and Bacethrombase-treated rats, after 14 days of i.v. injection at a dose of 10 mg/kg .....	131
Table 4.14: A comparison of <i>in vivo</i> thrombolytic activity of Bacethrombase, plasmin and streptokinase after 24 h of treatment on Wistar strain rat	135
Table 5.1: Screening for fibrinolytic enzyme producing bacteria from different samples of North- East India.....	146
Table 5.2: Identification of fibrinolytic enzyme producing potential bacteria based on fibrinolytic / caseinolytic ratio, substrate specificity and thrombolytic activity.....	146
Table 5.3: Biochemical and morphological tests of bacterial strain FF02B. Experiments were repeated in triplicates to ensure the reproducibility.	147
Table 5.4: Homologous search results of 16S-rDNA partial sequence of strain FF02B using Basic Local Alignment Tool (BLAST) tool from National Centre Biotechnology Information (NCBI). ....	148
Table 5.5: Homologous search results of 16S-23S ISR partial sequence of strain FF02B using Basic Local Alignment Tool (BLAST) tool from National Centre Biotechnology Information (NCBI). ....	151
Table 5.6: Summary of purification of Brevithrombolase from <i>Brevibacillus brevis</i> strain FF02B. The enzyme activity was assessed against fibrin. ....	157

Table 5.7: Amino acids composition of Brevithrombolase (% nmol).....	158
Table 5.8: Determination of substrate specificity of Brevithrombolase Values is mean $\pm$ S.D.....	159
Table 5.9: Determination of substrate specificity of Brevithrombolase .....	162
Table 5.10: The effect of inhibitors on fibrinolytic activity of Brevithrombolase .	163
Table: 5.11: A comparison of in vitro thrombolytic activity among Brevithrombolase, plasmin and Streptokinase under identical experimental conditions .....	167
Table 5.12a: Group mean terminal body weight (g) of control and treated rats for 14 days .....	175
Table 5.12 b: Group mean food consumption (g/kg body weight/day) trends for male Wistar albino rats for 14 days. ....	175
Table 5.12c: Group mean water consumption (mL/kg body weight/day) trends Wistar albino rats for 14 days. ....	175
Table 5.13: A comparison of hematological parameter in Brevithrombolase (10 mg/ml) treated and control rat after 14 days of injection (i.v).....	175
Table 5.14: A comparison of some biochemical properties of serum of control and Brevithrombolase-treated rats .....	177
Table 5.15: A comparison of <i>in vivo</i> thrombolytic activity of Brevithrombolase, plasmin and Streptokinase after 24 h of treatment on Wistar strain rat	181
