<b>Abstract</b>	i-iv
<b>Declaration</b>	
<b>Certificate of the supervisor</b>	
<b>Certificate of the external examiner and ODEC</b>	
<b>Acknowledgements</b>	
<b>Contents</b>	v- viii
<b>List of Tables</b>	ix-x
<b>List of Figures</b>	xi-xii
<b>List of Abbreviations</b>	xiii- xv
<b>Chapter 1 : Introduction</b>	<b>1-7</b>
1.1. Background	1
1.2. Heavy metals and Detoxification Mechanisms	2
1.3. Heavy metals and Bioremediation	5
1.4. Aims and objectives of the present study	7
<b>Chapter 2 : Review of literature</b>	<b>8-30</b>
2.1. Background	8
2.2. Heavy metals	9
2.3. Biological importance of few heavy metals	11
2.4. Heavy metals and human health/ associated diseases	13
2.5. Heavy Metal Detoxification Mechanism	17
2.5.1. Detoxification mechanism in prokaryotes	18
2.5.2. Detoxification Mechanism in Algae	20
2.5.3. Detoxification mechanism in Yeast/ Fungi	21
2.5.4. Detoxification mechanism in Plants	22
2.5.5. Heavy metals detoxification mechanism in animals	23
2.5.6. Lipoic acid and metal detoxification	25
2.6. Heavy metals and Environmental concern	26
2.7. Heavy metals and Remediation Methods/technologies	27
2.8. Future prospects of Bioremediation	30

<b>Chapter 3: Materials and methods</b>	<b>31-53</b>
3.1. Materials	31
3.1.1. Consumables	31
3.1.2. Chemicals & Media	31
3.2. Methods	33
3.2.1. Sample collection	33
3.2.2. Isolation and Screening of metal resistant strains	33
3.2.3. Identification of metal resistant strains	34
3.2.3.1. Biochemical test	34
3.2.3.2. Biolog microbial identification system	34
3.2.3.3. Identification of bacteria by 16S rDNA gene	35
3.2.3.4. Phylogenetic analysis	35
3.2.3.5. Nucleotide sequence accession numbers	35
3.2.4. Determination of optimal growth of <i>Pseudomonas aeruginosa</i> RV3 and <i>Bacillus cereus</i> NI40215	36
3.2.5. Comparative study of Antibiotic sensitivity for bacterial strains RV3 and NI40215	36
3.2.6. Effect of heavy metals on bacterial growth of identified bacterial strains RV3 and NI40215, and determination of MIC Value	37
3.2.7. Effect of Heavy metals on cellular damage: antioxidant enzyme system in <i>P. aeruginosa</i> RV3 & <i>B. cereus</i> NI40215	37
3.2.7.1. Reduced glutathione	38
3.2.7.2. Lipid peroxidation	38
3.2.7.3. Superoxide dismutase	39
3.2.7.4. Catalase	39
3.2.7.5. Glutathione peroxidase	39
3.2.7.6. Glutathione reductase	40
3.2.7.7. Protein Estimation	40
3.2.7.8. Statistical analysis	41
3.2.8. Metal uptake assay	41
3.2.9. Biophysical analysis for metal-microbe interactions	42
3.2.9.1. Cell morphology	42
3.2.9.1.1. Scanning Electron Microscopy (SEM).	42
3.2.9.1.2. Morphometric analysis	42
3.2.9.2. Energy Dispersive X-ray analysis (EDX)	43
3.2.9.3. Fourier Transform Infrared spectroscopy (FTIR)	43
3.2.9.4. Transmission Electron Microscopy (TEM)	43
3.2.10. Identification of differentially induced proteins in response to heavy metals (Cd & Cr) by 2DGE &	44

	MALDI-TOF MS	
3.2.10.1.	Sample preparation for 2-DGE	44
3.2.10.2.	Isoelectric focusing	44
3.2.10.3.	Sample preparation for In-gel digestion of Coomassie stained gels	45
3.2.10.3.1.	Excision of protein spots from polyacrylamide gels	45
3.2.10.3.2.	Reduction and alkylation	45
3.2.10.3.3.	In gel digestion	46
3.2.10.4.	Extraction of peptides for Mass spectrometric analysis and protein identification	46
3.2.11.	Cloning and characterization of LipA gene induced in response to heavy metals and prediction of it protein structure	46
3.2.11.1.	Chromosomal DNA isolation and purification	46
3.2.11.2.	Primer designing	48
3.2.11.3.	PCR amplification	49
3.2.11.4.	Ligation of PCR product into cloning vector	49
3.2.11.5.	Competent cell preparations	50
3.2.11.6.	Transformation of competent cells by heat shock method	50
3.2.11.7.	Blue white selection of recombinant clones	51
3.2.11.8.	Plasmid isolation	51
3.2.11.9.	Confirmation of clones by colony PCR	52
3.2.11.10.	Clone confirmation by restriction digestion	52
3.2.11.11.	Sequencing, Phylogenetic analysis and Structure prediction	52
<b>Chapter 4 :</b>	<b>Results</b>	<b>54-114</b>
4.1.	Isolation, Screening of metal resistant bacterial strains	54
4.2.	Identification of metal resistant strains	56
4.2.1.	Biochemical test	56
4.2.2.	Biolog microbial identification system (BMIS)	56
4.2.3.	16S rDNA sequencing and Phylogenetic analysis	60
4.3.1.	Determination of optimal growth conditions for <i>Pseudomonas aeruginosa</i> RV3 and <i>Bacillus cereus</i> NI40215	63
4.3.2.	Determination of Antibiotic sensitivity for <i>Pseudomonas aeruginosa</i> RV3 and <i>Bacillus cereus</i> NI40215	63

4.3.3.	Effect of Metals (Cd, Cr & Ni) on the growth and determination of MIC for the <i>Pseudomonas aeruginosa</i> RV3 and <i>Bacillus cereus</i> NI40215	63
4.4.1.	Effect of Metal ions (Cd, Cr & Ni) on Cellular damage: Response of GSH and Antioxidant Enzyme System in <i>Pseudomonas aeruginosa</i> RV3	71
4.4.2.	Effect of Metal ions (Cd, Cr & Ni) on Cellular damage: Response of GSH and Antioxidant Enzyme Systems in <i>Bacillus cereus</i> NI40215	72
4.5.1.	Biophysical analysis of Metal-Microbe interactions in <i>Pseudomonas aeruginosa</i> RV3	79
4.5.2.	Biophysical analysis of Metal-Microbe interactions in <i>Bacillus cereus</i> NI40215	86
4.6.1.	Bio-sorption of Heavy metals in the <i>Pseudomonas aeruginosa</i> RV3 and <i>Bacillus cereus</i> NI40215	92
4.7.1.	Proteomic approach for identification of proteins expressed in response to heavy metals (Cd & Cr) using 2DGE and MALDI-TOF spectroscopy	97
4.8.1.	Molecular cloning and characterization of gene encoding Lipoyl synthase identified by 2DGE method from <i>Pseudomonas aeruginosa</i> RV3	102
4.8.2.	<i>In silico</i> prediction of LipA protein structure using bioinformatics tools.	105
<b>Chapter 5 : Discussion</b>		<b>115-128</b>
<b>Summary and conclusion</b>		<b>129-133</b>
<b>Bibliography</b>		<b>134-158</b>
<b>Appendix</b>		<b>159-163</b>
