

List of Tables

1.1	Particles in the Standard Model.	5
2.1	Table of datasets used in the phenomenological analysis of this thesis. . .	30
2.2	Parameters characterizing the MRST2001[104] NLO parton distribution functions at $Q_0^2 = 1\text{GeV}^2$ defined by Eq. (2.1).	45
2.3	Parameters characterizing the CTEQ6M parton distribution functions at $Q_0^2 = 1.69\text{GeV}^2$ defined by Eq. (2.2).	46
2.4	Parameters characterizing the GRV98LO parton distribution functions at $Q_0^2 = 1.69\text{GeV}^2$ defined by Eq.(2.3).	46
2.5	Parameters characterizing the GRV98NLO parton distribution functions at $Q_0^2 = 1.69\text{GeV}^2$ defined by Eq.(2.3).	47
3.1	Summary of best fitting results for different structure functions.	59
8.1	Summary of referred analysis in our study of nuclear effects in various structure functions and sum rules.	138
9.1	Higher Twist corrections to F_2^{NS} structure functions at NNLO.	153
9.2	Higher Twist corrections to xF_3 structure functions at NNLO.	154
9.3	Higher Twist corrections to GLS sum rule at NNLO.	156
9.4	Higher Twist corrections to BSR at NNLO.	158
