

Contents

1	Introduction	1
1.1	Fundamental structure of matter	1
1.2	Quantum chromodynamics	7
1.3	Deep inelastic scattering and structure functions	9
1.4	Parton distribution functions	13
1.5	Gluon shadowing at small- x	15
1.6	Experiments and parametrizations	20
1.6.1	Experiments	20
1.6.2	Parametrizations	24
1.7	Outline of the thesis	31
2	Linear and Nonlinear QCD Evolution Equations	41
2.1	Linear evolution equations	41
2.1.1	DGLAP equation	42
2.1.2	BFKL equation	46
2.1.3	CCFM equation	47
2.2	Nonlinear evolution equations	48
2.2.1	GLR-MQ equation	50
2.2.2	MD-DGLAP equation	54
2.2.3	BK equation	55
2.2.4	MD-BFKL equation	56
2.2.5	JIMWLK equation	57
2.3	Solutions of evolution equations	58
3	NNLO Analysis of Singlet and Non-singlet Structure Functions in the DGLAP Approach	70

3.1	Introduction	70
3.2	Formalism	71
3.2.1	General framework	71
3.2.2	LO analysis of singlet and non-singlet structure functions . . .	74
3.2.3	NLO analysis of singlet and non-singlet structure functions . .	79
3.2.4	NNLO analysis of singlet and non-singlet structure functions .	81
3.3	Result and discussion	84
3.4	Summary	96
4	NNLO Analysis of Gluon Distribution Function in the DGLAP Approach	102
4.1	Introduction	102
4.2	Formalism	103
4.2.1	General framework	103
4.2.2	LO analysis of gluon distribution function	104
4.2.3	NLO analysis of gluon distribution function	106
4.2.4	NNLO analysis of gluon distribution function	107
4.3	Result and discussion	109
4.4	Summary	116
5	Shadowing Corrections to the Small-x Behaviour of Gluon Distribution Function	121
5.1	Introduction	121
5.2	Formalism	123
5.2.1	General framework	123
5.2.2	Solution of GLR-MQ equation for gluon distribution function and effect of gluon shadowing	125
5.2.3	Comparative analysis of DGLAP and GLRMQ equations . . .	131
5.2.4	Compatibility of Regge like solutions of gluon density with the DLA solution	132
5.3	Result and discussion	133
5.4	Summary	141

6	Shadowing Corrections to the Singlet Structure Function and Behaviour of F_2 Slope	148
6.1	Introduction	148
6.2	Formalism	149
6.2.1	General framework	149
6.2.2	Solution of GLR-MQ equation for singlet structure function and effects of gluon shadowing	151
6.2.3	Comparative analysis of DGLAP and GLR-MQ equations for singlet structure function	154
6.2.4	Derivative of the singlet structure function with respect to $\ln Q^2$	155
6.3	Result and discussion	156
6.4	Summary	164
7	Comparative Analysis of Various Nonlinear Evolution Equations	169
7.1	Introduction	169
7.2	Formalism	170
7.3	Result and discussion	173
7.4	Summary	174
8	Conclusion and Outlook	178
	Appendices	182
