<b>List of Tables</b>	Xv
<b>List of Figures</b>	xvi
<b>Abbreviations</b>	xxiii

## **Chapter I: Introduction**

1.1	Evolution of nanotechnology	1
1.2	Nanoscale Materials	1
1.2.1	Different kinds of nanomaterials	1
1.2.2	Properties of nanomaterials	2
1.2.2.1	High surface to volume ratio	2
1.2.2.2	Quantum confinement effect	3
1.2.2.3	Enhancement of band gap and blue shift	3
1.2.3	TYPES of nanostructures and density of states	4
1.2.4	Core-shell nanostructures	6
1.3	Photocatalysis phenomenon	14
1.4	Photovoltaic effect	16
1.5	Motivation of our work	20

## References

### **Chapter II: Structural and optical properties of core-shell Ag<sub>2</sub>S-HgS nanostructures**

2.1	Materials for Synthesis	37
2.1.1	Synthesis of Ag <sub>2</sub> S nanoparticles	37
2.1.2	Synthesis of core-shell Ag <sub>2</sub> S/HgS nanoparticles	38
2.2	Results and discussion	38
2.2.1	XRD characterization	39
2.2.2	TEM and EDX characterization	41
2.2.3	FTIR spectra analysis	43
2.3	Optical Property Analysis	45
2.3.1	UV-Vis Absorbance spectra analysis	45
2.3.2	Photoluminescence spectra analysis	46
2.3.3	Photocatalytic activity study	49
2.4	Conclusion	51

## Reference

### **Chapter III:A detailed study on structural and optical properties of core TiO<sub>2</sub> and shell MgO in TiO<sub>2</sub>/MgO nanostructures leading to enhanced photocatalytic activity in the core-shell nanostructure under daylight illumination**

3.1	Synthesis of TiO <sub>2</sub> nanoparticles	56
3.2	Morphological Properties	57
3.2.1	XRD pattern	57

3.2.2	HRTEM characterizaion	57
3.3	Optical Property Analysis	58
3.3.1	UV-vis absorption spectra	58
3.3.2	Photoluminescence spectra	59
3.4	Synthesis and characterization of shell MgO	60
3.4.1	Preparation of nanoscale MgO	60
3.4.2	Structural and morphological study	61
3.4.2.1	XRD pattern analysis	61
3.4.2.2	TEM image	62
3.4.3	Optical Property analysis	62
3.4.3.1	UV-Vis absorption study	63
3.4.3.2	Photoluminescence (PL) study	64
3.4.3.3	Temperature effect on the emission spectra	67
3.5	Synthesis of core-shell TiO <sub>2</sub> -MgO nanostructures	69
3.6	Structural and Morphological Properties of core-shell TiO <sub>2</sub> -MgO:	69
3.6.1	XRD pattern analysis	69
3.6.2	TEM image analysis	71
3.6.3	EDX spectra analysis	72

3.6.4	FTIR spectra	72
3.6.5	Raman spectra analysis	73
3.6.6	XPS spectra analysis	76
3.7	Optical property analysis	78
3.7.1	UV-vis absorption spectra	78
3.7.2	Photoluminescence spectra analysis	81
3.7.3	TRPL spectra analysis	83
3.8	Photocatalytic application	84
3.9	Conclusion	86
	Reference	88

**Chapter IV: Effect of shell precursor concentration on optical and photocatalytic properties of core-shell TiO<sub>2</sub>-SnO<sub>2</sub> nanostructures**

4.1	Synthesis of core-shell TiO <sub>2</sub> -SnO <sub>2</sub> nanostructures	94
4.2	Structural and morphological characterizations	95
4.2.1	XRD pattern analysis	95
4.2.2	HRTEM image analysis	97
4.2.3	EDX spectra analysis	98
4.2.4	Raman spectra analysis	98
4.2.5	XPS spectra analysis	101

4.3	Optical Property analysis	102
4.3.1	UV-vis absorbance spectra analysis	102
4.3.2	Photoluminescence spectra analysis	105
4.3.3	TRPL spectra analysis	108
4.4	Application of core TiO <sub>2</sub> nanoparticles and core-shell TiO <sub>2</sub> -SnO <sub>2</sub> nanostructures in photocatalysis	109
4.5	Conclusion	112
	Reference	

**Chapter V: Role of TiO<sub>2</sub> as a core and shell in two different core-shell nanocomposites for photocatalytic degradation of MB dye**

5.1	Synthesis of core-shell TiO <sub>2</sub> -ZrO <sub>2</sub> nanostructures	115
5.2	Structural characterization	116
5.2.1	XRD pattern analysis	116
5.2.2	TEM image analysis	117
5.2.3	EDX spectra analysis	118
5.2.4	Raman Spectra analysis	118
5.3	Optical property analysis	120
5.3.1	UV-vis absorbance spectra analysis	120
5.3.2	Photoluminescence (PL) spectra analysis	123
5.3.3	Photocatalytic activity	124

5.4	Synthesis of core-shell CdSe-TiO <sub>2</sub> nanoparticles	126
5.5	Structural characterization	127
5.5.1	XRD pattern analysis	127
5.5.2	TEM image analysis	127
5.5.3	EDX spectra analysis	128
5.6	Optical property analysis	128
5.6.1	UV-vis absorbance spectra analysis	128
5.6.2	Photoluminescence spectra analysis	131
5.6.3	Photocatalytic activity	132
5.7	Conclusion	133
	Reference	

## **Chapter VI: Optical and electrical properties of core-shell nanostructured films**

6.1	Preparation of TiO <sub>2</sub> film	135
6.1.1	Core-shell films	136
6.1.1.1	XRD pattern analysis	136
6.1.1.2	UV-vis absorbance spectra analysis	137
6.1.1.3	PL spectra analysis	140
6.1.1.4	Electrical characterization	141
6.1.1.5	Photovoltaic characterization	143

6.2	Photovoltaic device fabrication	144
6.2.1	Photoanode fabrication	144
6.2.2	Photocathode fabrication	144
6.2.3	Electrolyte synthesis	144
6.2.4	Device fabrication	144
6.3	Conclusion	146
	References	

## **Chapter VII: Conclusion and future directions**
