

## List of Tables

<b>Chapter</b>	<b>Table</b>	<b>Title</b>	<b>Page No.</b>
<b>Chapter II</b>			
	<b>2.1</b>	Calculation of lattice strain and crystallite size from W-H Plot	40
	<b>2.2</b>	Rate constant determination and degradation efficiency	51
<b>Chapter III</b>			
	<b>3.1</b>	Calculation of crystallite size and microstrain	70
	<b>3.2</b>	Calculation of phonon lifetime	76
	<b>3.3</b>	Calculation of band gap and Urbach energy	80
	<b>3.4</b>	Calculation of % degradation	85
<b>Chapter IV</b>			
	<b>4.1</b>	Calculation of microstrain and crystallite size	96
	<b>4.2</b>	Calculation of bond width of active raman peak and phonon lifetime	100
	<b>4.3</b>	Calculation of Urbach energy and band gap	104
	<b>4.4</b>	Calculation of rate constant and degradation efficiency	111
<b>Chapter V</b>			
	<b>5.1</b>	Calculation of crystallite size and microstrain	116
	<b>5.2</b>	Calculation of bond width of Raman active peak and phonon lifetime	120
	<b>5.3</b>	Calculation of band gap and Urbach energy	122
	<b>5.4</b>	Calculation of rate constant and % degradation	125
	<b>5.5</b>	Calculation of band gap and Urbach energy	130

<b>5.6</b>	Calculation of % degradation under different illumination time	131
------------	--	-----

## **Chapter VI**

<b>6.1</b>	Calculation of band gap and Urbach energy	139
<b>6.2</b>	Calculation of fill factor of the devices	145
