

ACKNOWLEDGMENT

It is my immense pleasure to express my sincere gratitude to my guide, Professor Tapan Kr. Gogoi , for his precious suggestion, incisive guidance and decisive insights during the entire course of Ph.D. research. His constant motivation and support has been the key behind the completion of this research work in time. He has helped me in almost all phases of my Ph.D. work. Without his guidance and assistance, it would not have been possible for me to complete this doctoral research work.

I wish to express my deepest gratitude to Prof. Dilip Datta, Prof. M. Hazarika, Dr. Partha Pratim Dutta and Dr. Sanjib Banerjee for their guidance and help in my research work and also for being associated with me as members of doctoral committee.

I can't fail to acknowledge the support provided by the faculty members of Mechanical Engineering Department, Tezpur University during the course of my research. They were always with me to support and advise me in carrying out the research in the right direction.

I express my sincere thanks to all the technical staff of the Mechanical Engineering Department. Specially, I would like to thank Mr. Khargeswar Rongpi for helping and assisting me in AUTO CAD drawing of the schematics.

I especially wish to thank the Tezpur University authority for providing the logistics and other facilities throughout the course of this doctoral study.

My small accomplishment would have not been possible if it was not for the endless patience of my beloved family members, particularly my father Sri Bhagaban Sarma and mother Mrs. Taru Devi.

Thank you all whom I did not mentioned here.

(Pranjal Sarmah)
