

## CONTENTS:

Acknowledgment	iii
Certificate	iv
Contents	v
1. Chapter 1	
1 Introduction	1
1.1 Nanoparticle	2
1.2 Semiconductor Nanoparticle	4
1.3 Doped semiconductor nanoparticle	6
1.4 Theoretical Aspects	7
2. Chapter 2	13
2. Synthesis process	14
2.1 Synthesis of the sample	15
3. Chapter 3	
3. Characterization	17
3.1 UV spectra of the sample	18
3.2 Transmission Electron Microscope pictures	19
3.3 Magneto optic effect: Faraday rotation	21
3.4 Analysis of the Characteristics	24
4. Chapter 4	
Application and future prospects	26
References:	27
