

CONTENTS

CHAPTER 1: Introduction

- 1.1: Structure of matter.
- 1.2: Deep in-elastic electron-proton scattering.
- 1.3: Structure function
- 1.4: Parton model and Bjorken scaling.
- 1.5: Low x-physics.
- 1.6: Evolution equation.
- 1.7: Altarelli Parisi (AP) equation.

CHAPTER 2: Taylor's Theorem

CHAPTER 3: AP evolution equation and gluon distribution

- 3.1: Importance of gluon distribution function.
- 3.2: Solution of A.P equation for gluon distribution function by new-muon collaboration (NMC) data.
- 3.3: C-programme to evaluate the value of gluon distribution function.
- 3.4: Result and discussion.

CHAPTER 4: Gluon distribution in next to leading order (NLO) at low-x

CHAPTER 5: Conclusion
