

1 Contents:

Chapter 1:	1
1. Introduction.....	2
1.1 Rate equation	3
1.2. Reaction rate	4
1.2.1 Reaction rate constant	4
1.3. Complex reaction mechanism	5
1.4. Arrhenius equation	10
1.4.1. Kinetic theories: interpretation of Arrhenius equation	12
1.4.2, Collision theory	13
1.4.3. Transition state theory	13
1.5. Model fitting approach	13
1.6. Isoconversional analysis	15
1.7. Kissinger method	17
1.8. Controversies in solid state kinetics	17
1.9. Thermal analysis techniques:	18
1.9.1. DTA	18

1.9.2. DSC	19
1.9.3. Features of DTA and DSC curves	21
Chapter 2:	22
2. New method of analysis:	23
2.1. Identification of kinetic law	23
2.2. Evaluation of activation energy	24
2.3 Statement of the problem	26
Chapter 3:	28
3. Theory	29
Chapter 4:	34
4. Experimental	35
4.1. Conclusion	40
5. References	41
6. Programmes	42
