1. INTRODUCTION.....	1-6
A. Thin Films.....	1
B. Thermal Evaporation.....	1
C. Growth Process of Thin Film.....	3
D. X-Ray Diffraction.....	3
a. Lattice plane and Bragg's law	3
b. Scherrer's formula.....	5
c. Determination of Lattice Constant.....	5
d. Grain Size.....	5
e. Average Strain.....	6
f. Dislocation Density.....	6
2. EQUIPMENTS USED AND DETAILS OF EXPERIMENTS.....	7-17
A. Apparatus Used.....	7
a. Vacuum Chamber	7
b. Vacuum Pumps.....	7
c. High Vacuum Valve.....	8
d. Working Principle of Diffusion Pump.....	8
e. Single Lever Plate type Valve.....	8
f. Air Admittance Valve.....	8
g. Water Cooling System.....	8
B. Measurement Of Pressure.....	9
a. Pirani Gauge.....	9
b. Penning Gauge.....	9
C. Experimental Procedure.....	10
D. Thickness Measurement Of Thin Films.....	11
a. Multiple reflection and refraction from a plane parallel film.....	11
b. Multiple Beam Interferometer Method.....	14
E. Resolution Of Thickness Measurement.....	17
3. RESULT AND CONCLUSION.....	18-20
A. Determination of grain size.....	18
B. Structural characterization of nano grains.....	18

C. Grain size versus thickness dependence.....	20
D. Scope for further studies.....	20
E. Summary.....	20
4. List of figures	
I. Fig. 1: Depicting Bragg's law.....	4
II. Fig. 2: Schematic diagram of Rotary Pump.....	7
III. Fig. 3: Circuit diagram for Pirani Gauge.....	9
IV. Fig. 4: Multiple beam reflections.....	11
V. Fig. 5: Optical path difference between two consecutive rays in multiple reflection	12
VI. Fig. 6: Amplitude of successive rays in multiple reflections.....	14
VII. Fig. 7: Schematic diagram of multiple beam interferometers.....	15
VIII. Fig. 8: Interferometer for Fizeau fringes of equal thickness in reflected monochromatic rays.....	16
IX. Fig. 9: Schematic diagram of fringe shift of equal thickness	16
X. Fig. 10: XRD patterns of Cu nano grains.....	18
XI. Fig. 11: Grain size versus thickness in Cu thin films.....	20
5. List of tables	
I. Table 1: Some relevant physical parameter of CdSe thin films	18
II. Table 2: Experimental data of Cu thin films.....	19
III. Table 3: Experimental data of Ag thin films.....	19
6. List of Plates	
I. Plate 2: Tolansky type multiple beam interferometer developed in our laboratory.	
II. Plate 3: The HINDHIVAC Coating Unit model no. 12A4D	
III. Plate 3: Multiple beam interference fringes
