

<b>Scheme No.</b>	<b>Scheme Name</b>	<b>Page No.</b>
<b>3.1.1</b>	Schematic representation of chitosan-MMT nanocomposite and its binding with As (V)	
<b>3.1.2</b>	Possible binding mechanism of MMT/Ct/Glu with arsenate ions	
<b>3.2.1</b>	Ex-situ preparation of Fe <sub>3</sub> O <sub>4</sub> magnetic nanoparticles and stabilization over chitosan	
<b>3.3.1</b>	Schematic representation of preparation of the nanocomposite and use in arsenic treatment	
<b>3.4.1</b>	Iron oxyhydroxide crosslinked starch-clay nanocomposite, preparation and application in arsenic remediation	
<b>3.6.1</b>	Preparation of CIRP and interactions among the components and its final use
