

## ACKNOWLEDGMENTS

This thesis is the culmination of my PhD journey which was just like climbing a high peak step by step accompanied by encouragement, hardship, trust and patience. Completion of this doctoral thesis was possible with the support of several people. It gives me immense pleasure in expressing my deep sense of gratitude to all those who contributed and supported in their own ways towards the successful completion of my research work and made this thesis possible.

At this moment of accomplishment, I am greatly indebted to my supervisor Dr. Bipul Sarma for his valuable guidance, scholarly inputs, constructive criticism and constant encouragement throughout my research career. This feat was possible only because of the unconditional support provided by Sir. I could not imagine having a better advisor and mentor for my PhD study.

I am indebted to my mentor for Commonwealth Split-site PhD Fellowship, Prof. Jonathan W. Steed at Durham University for allowing me to work under his supervision and providing his valuable suggestions during my stay at Durham.

I am indebted to the honourable Vice-Chancellor Prof. Vinod K. Jain and former Vice-Chancellor Prof. Mihir K. Chaudhuri of Tezpur University for allowing me to carry out my research in this beautiful University with the peaceful and scientific environment.

Besides, I am extremely grateful to Prof. Ashim Jyoti Thakur, Head, Department of Chemical Sciences, Tezpur University and also my Doctoral Research Committee member for his valuable support and helping hands in various aspects during my PhD tenure. I also extend my deep sense of gratitude to my doctoral committee member Dr. Utpal Bora, Assistant Professor, Department of Chemical Sciences, Tezpur University for his valuable suggestions and insightful comments which helped me to widen my research from various perspectives. I would like to take this opportunity to acknowledge Prof. Ashwini Nangia for his valuable suggestion and support.

My whole-hearted thanks go to all teaching and non-teaching staffs of the Department of Chemical Sciences, Tezpur University and Department of Chemistry, Durham University, UK, without whom the thesis would not come to successful completion. I would also like to thank the Sophisticated Analytical Instrumentation Centre (SAIC), Tezpur University for providing the instrumental facilities during my research work.

While speaking about the instruments, we can't forget about the operators who are devoting their time to maintain good health of the instruments. In this connection, I would like to mention Nipu da, Shankur Da, Manoranjan Da, Biraj Da, Prakash da and Anil da for their services related to the analysis of data. The moment also reminds me of

the immense help I receive from Dr. DS Yufit to collect the single crystal data at Durham University. Dr. Matt Mulvee is acknowledged for SEM data collection.

No research is possible without the library, the centre of learning resources. I take the opportunity to express my gratitude to all the library staff for their services.

I gratefully acknowledge the funding agencies Department of Science and Technology (DST), Government of India and Commonwealth Split-site PhD Fellowship for providing me with the financial support during my PhD tenure.

My labmates- Rajiv da, Pranita, Rupa ba, Dhruva da, Kasturi, Manali, Shrabani, Debabrat and Nazima Ba have all extended their love and support in a very special way by making the laboratory an enjoyable place to work and gifting me fond memories of my time in Lab no. 234. In this context, I can't forget my lab members in Durham University -James, Amy, Matt, Lottie, Jess, Yui, Luke, Carla and Crystal who supported me feel comfortable and work in a homely manner in the United Kingdom. The days in the UK will remain specially itched in my memory for the special rapport that I share with Ivan, Manuel, Celia, Stina, Abhijit da, Rick da. I would like to remember Dr. Shankha Banerjee for his brotherly affection and support.

I would like to give my special thanks to Gariyoshi, for her constant encouragement and moral support whenever I feel low or frustrated during this journey at Tezpur University. I would also like to share my love and acknowledgement to little Pranchu. Special mention goes to friends- Champak, Upakul, Iftak, Salma, Anup, Bhaskar da, Ankur, Rinku, Chandrama, Himadri, Kabirun, Runjun, Kumar, Sudhir, Palash, Kiran da, Ashish, and all junior research scholars in the Department of Chemical Sciences.

Last but not the least, a special thanks to my family. Words cannot express how grateful I am to my beloved parents, brother and sisters for their constant support throughout my career. I owe a lot to them who helped me at every stage of my personal and academic life and longed to see this achievement come true.

Thank you to each and everyone for all your support, without which this achievement would not have been possible.
