List of Figures.....	6
List of Tables.....	9
List of Abbreviations.....	10
1. Introduction.....	11
1.1 A brief Review of Web services	11
1.1.1 Definition.....	12
1.1.2 Potential and Problems.....	12
1.1.3 Architecture and Research Issues.....	13
1.2 Motivation.....	20
1.3 Contribution.....	21
1.4 Thesis Structure.....	23
2. Related Works.....	25
2.1 Overview of Trust and Reputation.....	25
2.1.1 Defining Trust.....	25
2.1.1.1 Trust in Psychology.....	25
2.1.1.2 Trust in Sociology.....	25
2.1.1.3 Trust in Economics.....	26
2.1.1.4 Trust in Computer Science.....	27
2.1.2 Defining Reputation.....	28
2.1.3 Properties of Trust.....	29
2.1.3.1 Trust is subjective.....	30
2.1.3.2 Asymmetric.....	30
2.1.3.3 Propagative.....	31
2.1.3.4 Context Dependent.....	32
2.1.3.5 Dynamic.....	33
2.2 Trust and Reputation Models.....	34
2.2.1 General Models.....	34

2.2.1.1	Application-based Taxonomy.....	34
2.2.1.2	Computational Technique-based taxonomy.....	37
2.2.2	Web service specific Models.....	39
2.2.2.1	Single Web service.....	40
2.2.2.1.1	Feedback based models.....	40
2.2.2.1.2	Statistical models.....	42
2.2.2.1.3	Fuzzy Models.....	45
2.2.2.1.4	Data Mining based models.....	47
2.2.2.2	Composite Web service.....	48
2.2.2.2.1	Statistical models.....	48
2.2.2.2.2	Game Theoretic models.....	50
2.2.2.3	Communities of Web services.....	52
2.2.2.3.1	Analytical models.....	52
2.2.2.3.2	Game Theoretic models.....	56
3.	Markov Model Driven Gaussian Process Trust Models.....	59
3.1	Introduction.....	59
3.2	Background.....	60
3.2.1	Markov Models.....	60
3.2.1.1	Markov Chains.....	60
3.2.1.2	Hidden Markov Model.....	60
3.2.1.3	Basic Problems of HMM.....	61
3.2.1.4	Forward-Backward Algorithm.....	61
3.2.1.5	Viterbi Algorithm.....	63
3.2.1.6	Baum-Welch Algorithm.....	64
3.2.2	Time Series Prediction.....	67
3.2.3	Gaussian Process.....	69
3.2.4	An Example of Gaussian Process Regression.....	73
3.3	Proposed Model.....	75
3.3.1	Definitions.....	75
3.3.2	Architecture and Data structures.....	76

3.3.3	Trust Intermediaries.....	78
3.3.4	Information sources.....	79
3.3.5	Trust Equation.....	82
3.3.6	Direct Trust Calculation.....	83
3.3.7	Indirect Trust Calculation.....	84
3.3.8	Trust Prediction.....	87
3.4	Experiment and Results.....	103
3.4.1	Experiment using Synthetic Data.....	104
3.4.1.1	Data Generation.....	104
3.4.1.2	Parameters Setting.....	105
3.4.1.3	Experimental Results.....	105
3.4.2	Experiment using Real Data Set.....	108
3.4.2.1	About the Real Data Set.....	108
3.4.2.2	Data Preparation.....	108
3.4.2.3	Experimental Results.....	110
3.5	Discussion and Conclusion.....	113
4.	Adaptive Ensemble of Gaussian Processes for Trust	
	Modelling.....	115
4.1	Motivation.....	115
4.2	GP kernels.....	116
4.2.1	Basic kernels and Their structures.....	117
4.2.2	Combining kernels.....	118
4.3	Proposed Model.....	119
4.3.1	Model Assumption.....	119
4.3.2	Trust prediction framework.....	120
4.3.2.1	Ensemble Prediction.....	124
4.3.2.2	Self- Correction of Ensemble eight.....	125
4.3.2.3	Model Selection.....	126
4.3.2.4	Incremental update of Ensemble Member..	131
4.4	Experiment and Results.....	133
4.5	Conclusion.....	157

5. Heteroscedastic Gaussian Process Trust Model for Reputation	
Sources with Independent Error Distribution.....	158
5.1 Heteroscedastic GP.....	159
5.2 Proposed Model.....	160
5.2.1 Problem Formulation.....	160
5.2.2 Generative Model.....	163
5.2.3 Model prediction.....	164
5.2.4 Parameter Training.....	167
5.2.5 Malicious feedback Detection Mechanism.....	171
5.2.6 Final Algorithm.....	171
5.3 Experiment and Result.....	172
5.3.1 Data set.....	172
5.3.2 Experimental Results.....	174
5.4 Conclusion.....	177
6. Conclusion	
6.1 Summary.....	179
6.2 Future Work.....	181
Bibliography
