

ACKNOWLEDGMENT

First and foremost, I would like to express my sincere gratitude to my supervisor Prof. Tapan Kr. Gogoi for his valuable guidance, advice and assistance throughout my research. His constant motivation and support has been the key behind the completion of this research work in time. He has helped me in almost all phases of my Ph.D. work. Without his guidance and assistance, it would not have been possible for me to complete this doctoral research work.

I would also like to acknowledge with many thanks my co-supervisor Prof. Sujit Ghosal for his valuable suggestions and encouragement during the period of my research work. I especially wish to thank both my supervisors for the corrections and improvements suggested for this thesis.

I wish to express my deepest gratitude to Prof. Dilip Datta, Prof. S.M. Hazarika, Prof. Jiten Ch. Dutta and Dr. Sanjib Banerjee for their guidance and help in my research work and also for being associated with me as members of doctoral committee.

I can't fail to acknowledge the support provided by the faculty members of Mechanical Engineering Department, Tezpur University during the course of my research. They were always with me to support and advise me in carrying out the research in the right direction.

I express my sincere thanks to all the technical staff of the Mechanical Engineering Department. Specially, I would like to thank Mr. Khargeswar Rongpi for helping and assisting me in AUTO CAD drawing of the schematics.

I especially wish to thank the Tezpur University authority for providing the logistics and other facilities throughout the course of this doctoral study.

My small accomplishment would have not been possible if it was not for the endless patience of my beloved family, particularly my father Late Prof. Sambhu Ram Talukdar and mother Mrs. Mina Talukdar.

Thank you all whom I did not mentioned here.
