

Acknowledgements

At the very outset, I take it as an honour to express my profound gratitude and sincere thanks to my respected guide Dr. Dilip Datta, Professor, Department of Mechanical Engineering, Tezpur University, for his invaluable supervision, guidance and constructive suggestions and particularly for his meticulous approach and gracious engagement at each and every stage of the course to make this project a reality and success.

I also express my gratitude towards all the faculty members of the department for their untiring support and co-operation during the whole duration of my Ph.D. course. In addition I would also like to offer my sincere thanks to the institute authority, especially the personnel of the Mechanical Engineering Department, for providing me the access to the laboratory and research facilities.

I am also deeply grateful to my family members for their unconditional support that gave me the encouragement to complete my Ph.D. course. And most of all for my patient wife, Tutumani, whose faithful support during the final stages of this Ph.D. is so appreciated.

Last but not the least, heartiest thanks to the Almighty, who bestowed all his blessings on me.

Abhijit Deka

Dedicated to my

Parents, Teachers and friends
