

## List of Tables

---

<b>Table 3.1:</b>	Monthly average of weather parameters for last 17 years (2000-2016)	54
<b>Table 4.1:</b>	Comparison of Flora of Sonitpur district with Assam's Flora and Flora of India	425
<b>Table 4.2:</b>	Comparison of top ten dominant families of present record with Assam's Flora and Flora of India	427
<b>Table 4.3:</b>	Comparison of families with their respective genera and species with the Assam's Flora.	429
<b>Table 4.4:</b>	List of the recorded species that are not included in Flora of Assam	438
<b>Table 4.5:</b>	RET taxa recorded from Sonitpur district.	443
<b>Table 4.6:</b>	Endemic taxa of Northeastern region of India.	445
<b>Table 4.7:</b>	Alien taxa recorded from the study area	447
<b>Table 5.1:</b>	List of medicinal plants used by Munda community for human care	474
<b>Table 5.2:</b>	FIC values against some important health ailments/diseases	481
<b>Table 5.3:</b>	Table showing FL values against some used reports on ailments/diseases.	482
<b>Table 5.4:</b>	List of recorded plant species used by Garo peoples for treatment of different health ailments	487
<b>Table 5.5:</b>	Table showing FIC values for Garo community against some important	496

	diseases	
<b>Table 5.6:</b>	Table showing FL values for Garo community against some important diseases and respective plant species.	497
<b>Table 5.7:</b>	Data showing the different medicinal plants used against different ailments/diseases by Mishing community.	505
<b>Table 5.8:</b>	FIC values for Garo community against some important diseases.	518
<b>Table 5.9:</b>	Table showing FIC values for Garo community against some important diseases.	519
<b>Table 5.10:</b>	List of recorded plant species used by <i>Munda</i> , <i>Garo</i> and <i>Mishing</i> communities for different ailments/ diseases.	522
<b>Table 6.1:</b>	List of plant species collected by the Mishing community as NTFPs.	539

## List of Figures

---

<b>Figure 3.1:</b>	Location map of erstwhile Sonitpur district	49
<b>Figure 3.2:</b>	Location map of Protected Areas in the study area.	50
<b>Figure 3.3:</b>	Location map of major Reserve Forests of the study area.	51
<b>Figure 3.4:</b>	Recent (2017) forest cover map of the study area.	52
<b>Figure 3.5:</b>	Monthly average weather parameters for last 17 years (2000-2016)	54
<b>Figure 4.1:</b>	Contributions of different habits of plants with respect to taxonomic composition	426
<b>Figure 4.2:</b>	Comparison of recorded genera and species with their respective families	437
<b>Figure 5.1:</b>	Location map of surveyed villages of Munda community.	473
<b>Figure 5.2:</b>	Percentage of species used for treatment of human health ailments	480
<b>Figure 5.3:</b>	Percentage of different plant parts used for treatment of human health ailments	480
<b>Figure 5.4:</b>	Location map of surveyed villages of Garo community	486
<b>Figure 5.5:</b>	Percentage of plant parts used in treatment of various health ailments.	495
<b>Figure 5.6:</b>	Percentage of species used against treatment of different ailments/diseases	495
<b>Figure 5.7:</b>	Location map of major surveyed villages of Mishing community.	504

<b>Figure 5.8:</b>	Percentage contribution of plant parts used in preparation of herbal medicine.	517
<b>Figure 5.9:</b>	Percentage contribution of plant species used for treatment of health ailment/diseases	517
<b>Figure 6.1:</b>	Percentage of utilization of different NTFPs collected	549
<b>Figure 6.2:</b>	Percentage composition of different plant parts of collected as NTFPs by Mishing community.	549

## List of Illustrations
