

CONTENTS	Page No.
LIST OF TABLES	i
LIST OF FIGURES	ii-vii
LIST OF SYMBOLS AND ABBREVIATIONS	viii-ix
CHAPTER I	
Introduction	1-28
1.1 Introduction to light scattering	3
1.2 Light scattering as an optical characterization tool	4
1.3 Computational tools	8
1.3.1 Computational tools for spherical particles (Mie theory)	8
1.3.2 Computational characterization techniques for nonspherical particles	9
1.3.2.1 Finite Element Method (FEM)	9
1.3.2.2 Finite-Difference Time-Domain method (FDTD)	9
1.3.2.3 Discrete Dipole Approximation (DDA)	10
1.3.2.4 T-Matrix Method (TMM)	11
1.3.2.5 Geometric Optics Approximation (GOA)	11
1.3.3 Computational Codes in public domain	11
1.3.3.1 T -matrix code	12
1.3.3.2 DDSCAT code	12
1.4 Light scattering experimentations	12
1.4.1 Static light scattering	12
1.4.2 Experimental measurements of scattering matrix elements	14
1.5 Origin of the problem	16
1.6 Objectives of the work	17
1.7 Outline of the thesis	17
References	20

CONTENTS	Page No.
CHAPTER II	
Theory of light scattering and Discrete Dipole Approximation	29-53
2.1 Introduction	31
2.2 Light scattering and Maxwell's equations	32
2.2.1 The Poynting vector and boundary conditions	33
2.2.2 Maxwell's equations for an isotropic dielectric media	36
2.3 Theory and mathematical formalism of Discrete Dipole Approximation	37
2.3.1 Short theoretical background of DDA	37
2.3.2 Mathematical formalism of DDA	38
2.3.3 Calculation of scattering parameters, efficiencies and cross sections	40
2.3.4 Mueller Matrix or Scattering Matrix	45
2.4 Size and shape averaging of the scattering parameters	48
References	51
CHAPTER III	
Computational techniques and experimental setup	55-90
3.1 Introduction	57
3.2 Computational techniques	57
3.2.1 Blender 3D	58
3.2.2 DDSCATConvert	59
3.2.3 ParaView	62
3.2.4 DDSCAT: Advantages and Limitations	62
3.2.5 Size and shape averaging of realistic samples	67
3.2.5.1 MATLAB© code for Post processing	69
3.3 Experimental setup for light scattering studies	70
3.3.1 Measurable quantities of a light scattering event	70
3.3.2 The experimental setup for optical characterization	74
3.3.2.1 Lasers	75
3.3.2.2 Photodetector	76

CONTENTS	Page No.
3.3.2.3 Particle sprayer system	78
3.3.2.3.1 Aerosol sprayer system	78
3.3.2.3.2 Liquid particle sprayer system	80
3.3.2.4 Data acquisition system	81
3.3.3 Correction for scattering volume and detector angle	82
3.3.4 Calibration of the light scattering setup	83
References	87
CHAPTER IV	
Light scattering simulations of interstellar graphite and fayalite dust analogues	91-124
4.1 Introduction	93
4.2 Light scattering studies of graphite	93
4.2.1 Physical properties of the graphite particles	98
4.2.2 Results and discussions	100
4.3 Light scattering studies of fayalite dust analogues	107
4.3.1 Synthesis of fayalite dust samples	107
4.3.2 Characterization of fayalite particles	119
4.3.3 X-ray diffraction (XRD) analysis	111
4.3.4 Dust analogue models of fayalite	111
4.3.5 DDA computations and comparative study with experimental results	114
4.3.6 Results and Discussions	118
4.4 Conclusions	119
References	120
CHAPTER V	
Visible light scattering properties of silica microparticles	125-146
5.1 Introduction	127
5.2 Computational technique for particle sizing of silica microparticles	128

CONTENTS	Page No.
5.3 Physical properties of silica microparticles	132
5.3.1 Particle size distribution	132
5.3.2 Refractive index values of silica	134
5.4 Computed scattering parameters	134
5.4.1 Single scattering albedo (a) and Asymmetry parameter (g)	134
5.4.2 Comparative analyses of F_{11} and $-F_{12}/F_{11}$	135
5.5 Results and discussions	137
5.6 Conclusions	140
References	142

CHAPTER VI

Light scattering studies of interstellar dust analogue graphite and fayalite mixture

	147-169
6.1 Introduction	149
6.2 Computational dust models of graphite and fayalite	150
6.3 Physical properties of the graphite and fayalite particles	153
6.4 Comparative analyses of Model1 and Model2	154
6.4.1 Computational results of Model1	155
6.4.1.1 The computed parameters	156
6.4.1.2 The comparative analyses for F_{11} and $-F_{12}/F_{11}$	157
6.4.2 Computational results Model2	158
6.4.2.1 The computed parameters	159
6.4.2.2 The comparative analyses for F_{11} and $-F_{12}/F_{11}$	162
6.5 Results and Discussions	163
6.6 Conclusions	164
References	165

CHAPTER VII

Conclusions and Future Directions

Publications

171 - 175
