

CONTENTS	Page No.
LIST OF TABLES	i
LIST OF FIGURES	ii-v
LIST OF SYMBOLS AND ABBREVIATIONS	vi-vii
CHAPTER I	1-17
Introduction to the Research Problem	
1.1 Reconfigurable antenna – an introduction	3
1.2 Problem formulation and objectives	7
1.3 Thesis structure and outline	8
References	10
CHAPTER II	19-41
Frequency Reconfigurable Planar Slot Antenna Using PIN Diodes	
2.1 Introduction	21
2.2 Measurement and simulation tools	22
2.3 Rectangular microstrip patch geometry	23
2.3.1 Base antenna design	23
2.3.2 Performance studies of the base antenna	24
2.4 Frequency reconfigurable meandered slot antenna	25
2.4.1 Design of the meandered slot antenna	25
2.4.2 Optimization of the slot dimensions	26
2.4.3 Proof of concept of reconfiguration	28
2.5 Implementation and study of reconfiguration mechanism	30
2.5.1 Reconfigurable meandered slot antenna with PIN diode	30
2.5.2 Performance studies of the reconfigurable slot antenna	31
2.6 Discussion	36
References	38

CONTENTS	Page No.
CHAPTER III	43-67
Multi Stepped Beam Reconfiguration in Planar Antenna Using PIN Diodes	
3.1 Introduction	45
3.2 Topology of beam scanning patch antenna	45
3.2.1 Driving antenna	45
3.2.2 Directing elements	46
3.2.3 Optimization of the directing element's position	46
3.3 Reconfiguration mechanism	49
3.3.1 Performance studies of beam reconfiguration	50
3.4 Discussion	62
References	65
CHAPTER IV	69-89
Magnetically Controlled Microfluidic Tuning for Frequency Reconfiguration in Planar Geometry	
4.1 Introduction	71
4.2 Development of magnetically controlled microfluidic switch	71
4.2.1 Synthesis of magnetic nanoparticles	72
4.2.2 Characterization of magnetic nanoparticles	72
4.2.3 Synthesis and characterization of the fluids	76
4.3 Magnetically controlled frequency reconfigurable antenna	78
4.3.1 Fabrication of microfluidic channel embedded substrate	78
4.3.2 Design and fabrication of the frequency reconfigurable antenna	79
4.3.3 Mechanism of frequency reconfiguration with microfluidic channels	81
4.4 Antenna performance study with microfluidic actuation	82
4.5 Discussion	85
References	87

CHAPTER V	91-110
Magnetically Controlled Technique for Antenna Beam Pattern Reconfiguration	
5.1 Introduction	93
5.2 Realization of microfluidic actuated directing element	93
5.3 Design of beam reconfigurable antenna using microfluidic switch	95
5.3.1 Driven Element	95
5.3.2 Parasitic elements	95
5.4 Reconfiguration of the antenna beam pattern	99
5.4.1 Implementation of the reconfiguration mechanism	99
5.4.2 Performance study of the antenna	100
5.5 Discussion	106
References	108
CHAPTER VI	111-116
Conclusions and Future Directions
