Abstract **i**

Declaration **ii**

Acknowledgement **iv**

Table of Contents **vi**

1 Introduction **1**

1.1 Introduction 1

1.2 Review of literature 3

1.3 Chapter-wise brief summary of the thesis 10

2 Minimal reducing subspaces of an operator weighted shift **13**

2.1 Introduction 13

2.2 Unitary equivalence 13

2.3 Direct sum of scalar shifts 20

2.4 Extremal functions of reducing subspaces 24

2.5 Minimal Reducing subspaces 32

2.6 Conclusion 35

3 Minimal reducing subspaces of the unilateral shift U_+ on $H^2(B)$ **37**

3.1 Introduction 37

3.2 An Extremal Problem 46

3.3 Minimal reducing subspaces 47

3.4 Conclusion 49

4 Minimal reducing subspaces of operator pseudo shifts of type I 51

4.1 Introduction 51

4.2 Preliminaries 53

4.3 φ induced partition of $\mathbb{N}_0$. 55

4.4 Transparent sequences. 60

4.5 Minimal reducing subspaces 70

4.6 Necessary and sufficient conditions for minimality. 74

4.7 Conclusion 77

5 Operator pseudo shifts of types II and III 79

5.1 Introduction 79

5.2 Unitary equivalence 80

5.3 Reducing subspace of bilateral weighted shift W on $\ell^2(\mathbb{C})$ 84

5.4 Minimal reducing subspaces for T_φ of type II. 89

5.5 Minimal reducing subspaces for T_φ of type III. 90

5.5.1 For $\lambda \in \mathcal{M}_3$, $o(\lambda) = 1$ 90

5.5.2 For $\lambda \in \mathcal{M}_3$, $o(\lambda) = 2$ 91

5.5.3 For $\lambda \in \mathcal{M}_3$, $o(\lambda) = 3$ 93

5.5.4 For $\lambda \in \mathcal{M}_3$, $o(\lambda) = r$ 98
