List of Symbols		xxiii-xxvi
List of Abbreviation		xxvii-xxix
Chapter I		
Introduction to the Research Problem		
1.0	Introduction	1
1.1	Gas Sensor	1
1.2	MOS Gas Sensor and E-Nose	2
1.2.1	Correlation between human nose and E-Nose	3
1.3	MOS Gas Sensor Chemometrics	4
1.4	Sensor Dynamics	7
1.5	Electronic Nose Set-up	8
1.6	Measurement Procedure	9
1.7	Direct Interfacing Circuit	10
1.8	Inference System	12
1.8.1	Feature Extraction	13
1.8.2	Data Clustering	13
1.8.2.1	Principal component analysis (PCA)	13
1.8.2.2	Linear discriminant analysis (LDA)	14
1.8.2.3	Self organized feature map (SOFM)	15
1.8.3	Classification	16
1.8.4	Artificial neural network	17
1.8.4.1	Learning algorithm of FFBP ANN [103]	22
1.8.5	Advanced approaches to classification and data handling	24
1.9	PIC Microcontroller	25
1.10	Literature Survey	25
1.10.1	Tea aroma classification: CAT based systems	26
1.10.2	Tea aroma classification: microcontroller based systems	28
1.10.3	Direct interface circuit (DIC)	30

1.10.4 Commercial and portable electronic nose 32
1.11 Formulation of Research Problem and Motivation for the Present Work 34
1.12 Thesis Outline 36
References 38
Chapter II
Low Cost Portable E-Nose
2.0 Introduction 48
2.1 Properties of Tea Samples 49
2.2 Experimental setup 50
2.2.1 Sensor Chamber 51
2.2.2 Sensor array 52
2.2.3 Sample chamber 53
2.2.4 Heating bulb 53
2.2.5 Pumps and valve 54
2.2.6 Mass flow controller (MFC) 54
2.2.7 Relay Unit 54
2.2.8 Power supply 55
2.3 Development of the Circuits 55
2.3.1 Sensor circuit 56
2.3.2 Sensor array circuit 57
2.3.3 Relay unit PCB 58
2.3.4 Power supply PCB 58
2.4 Data Acquisition Card 59
2.4.1 Control 60
2.4.2 Acquisition 60
2.5 Sensor Selection 61
2.6 Feature Extraction 64
2.7 Pattern Clustering and Classification Methods 65
2.8 Experimental Results of CAT based Tea Classifier 66
2.9 Handheld and Portable E-Nose System 67
2.10 Sample cum Sensor Chamber 68
2.11 Auxiliary Components 71

2.11.1 Battery and charger 71
2.11.2 Keypad interfacing 71
2.11.3 LCD Interfacing 72
2.11.4 Printed Circuit Board (PCB) 74
a Sensor array PCB: 74
b Power Supply PCB: 74
c Microcontroller PCB: 75
2.11.5 Plastic Cabinet 75
2.11.6 Specification and features 77
a Material/components used 77
b Salient features of prototype 77
2.12 Sequence of Operation 77
2.13 Results and Discussion 80
2.13.1 Sensor Responses 80
2.13.2 Principal component analysis (PCA) and self organized feature mapping (SOFM) 81
2.13.3 Training of ANN 82
2.13.4 Performance of ANN 84
2.14 Conclusion 86
References 88

Chapter III

Direct Interfacing Circuit based E-Nose

3.0 Introduction 90
3.1 Operating Principle 91
3.1.1 DIC based measurement 91
3.2 Sensor Interfacing and Data Acquisition 97
3.2.1 MOS gas sensors 97
3.2.2 Interface circuit 98
3.2.3 Measurement technique 100
3.3 Experimental Setup 103
3.3.1 Sample Preparation 103
3.4 Experimental Results 104
3.4.1 Scalability Analysis 113

3.4.2 ANN Performance 117
3.5 Conclusion 118
References 119
Chapter IV
Error Compensation and Uncertainty Analysis in Direct Interfacing E-Nose
4.0 Introduction 122
4.1 Error Compensation 123
4.1.1 Non-linear direct interfacing based ADC (nADC) 125
4.2 Error Compensation 128
4.3 Experimental Setup 131
4.4 Clustering and Classification 133
4.5 Results and Discussion 134
4.5.1 Measurement system 134
4.5.2 Clustering and classification 141
4.6 Measurement Uncertainty 147
4.6.1 Uncertainty estimation 149
4.6.2 Results and discussion 151
4.7 Conclusion 157
References 159
Chapter V
Conclusion and Future Scope
5.0 Conclusion 162
5.1 Limitations of the Work 166
5.2 Future Research Option 166
List of Publications 168
Appendix A 169
