

TABLE OF CONTENTS

Abstract	i-vii
Declaration by the candidate	viii
Certificate of Supervisor	ix
Certificate of External Examiner	x
Acknowledgements	xi-xii
Table of Contents	xiii-xvii
List of Tables	xviii-xxi
List of Figures	xxii-xxv
Abbreviations	xxvi
CHAPTER I: General Introduction	
1.1 Introduction	1-6
1.2 References	7-12
CHAPTER II: Review of literature	
2.1 Historical background of <i>Macaca munzala</i>	13
2.2 Macaque evolution and dispersal	13-15
2.3 Population distribution and habitat	15-16
2.4 Activity and feeding pattern	16-18
2.5 Nutritional perspective of feeding pattern	18-19
2.6 Primate vocalization and behaviour	19-21
2.7 References	22-50
CHAPTER III: Material and methods	
3.1 Study area: Arunachal Pradesh	51-54
3.1.1 Study site (Population and habitat survey)	55
3.1.2 Geo-political and socio-economic demography	55
3.1.3 Altitude, Geomorphology, soil and climate	55
3.1.4 Forest cover, forest type and biodiversity	56-57
3.2 Behavioural study site	57-59
3.2.1 Climate	60
3.3 Study site (Morphometry and colour variation)	60
3.4 Study animal	61
3.4.1 Taxonomic position and morphological characteristics of <i>Macaca</i>	61

<i>munzala</i>	
3.4.2 Study troop	62
3.5 Methods and data analysis	62-64
3.5.1 Ecological niche modeling, population status and habitat survey	64
3.5.2 Time spent activity, feeding pattern and ranging behaviour	65
3.5.3 Nutritional ecology	67
3.5.4 Morphometric and colour variation	67
3.5.5 Spectrogram analysis	68
3.8 References	69-75
CHAPTER IV: Ecological niche modelling and population status of the endangered <i>Macaca munzala</i> in Arunachal Pradesh, India	
4.1 Introduction	76-77
4.2 Methods	77
4.2.1 Study area	77
4.2.2 Initial occupancy survey	78-80
4.2.3 Distribution modelling	80-82
4.2.4 Ecological niche modelling (ENM)	82
4.2.5 Validation of model	82
4.2.6 Population survey	83
4.3 Result	83
4.3.1 Predicative distribution range	83-85
4.3.2 Population status and troop composition	86-90
4.3.3 Encounter rate	90
4.4 Discussion	91-96
4.5 References	97-100
CHAPTER V: Habitat structure, status and conservation of <i>Macaca munzala</i> in protected and non-protected habitat, western Arunachal Pradesh, India	
5.1 Introduction	101
5.2. Methods	102
5.2.1 Study area	102
5.2.2 Plant community structure	103-104
5.2.3 Anthropogenic disturbance	104-105

5.2.4 Statistical analysis	105
5.3 Result	105
5.3.1 Species diversity	105-107
5.3.2 Density, basal area, IVI and diversity indices	107-108
5.3.3 Plant community structure	109-117
5.3.4 Girth class distribution and basal area	118
5.3.5 Similarity index of habitat	119
5.3.6. Anthropogenic disturbance	120-121
5.4 Discussion	121-125
5.5. Reference	126-134
CHAPTER VI: Behaviour ecology of <i>Macaca munzala</i>	
6.1 Activity and feeding pattern of <i>Macaca munzala</i> in heterogeneous habitats of western Arunachal Pradesh, India	
6.1.1 Introduction	135
6.1.2 Methods	136
6.1.3 Study site and study animal	136
6.1.4 Time activity budget and feeding pattern	137-139
6.1.5 Habitat characteristics and Food Availability Index (FAI)	139-140
6.1.6 Selection ratio and dietary spectrum	140
6.1.7 Data analysis	140
6.1.8 Result	141
6.1.9 Annual activity Pattern	142
6.1.10 Monthly variation in activity pattern	142-146
6.1.11 Seasonal variation in activity pattern	146-150
6.1.17 Food materials and feeding plants	151-158
6.1.18 Food plant diversity	159-166 166-168
6.1.19 Selection ratio and annual dietary spectrum for the study troops	
6.1.20 Discussion	168-173
6.1.21 Reference	174-178
6.2 Home range use and habitat use pattern of Arunachal macaque <i>Macca munzala</i> in western Arunachal Pradesh, India	
6.2.1 Introduction	179

6.2.3 Methods	180
6.2.4 Study area	180
6.2.5 Home range and daily path length	181
6.2.6 Vegetation survey and food plant	181
6.2.7 Results	182
6.2.8 Daily path length (DPL)	182
6.2.9 Home range size and habitat use pattern	183-185
6.2.10 Use of different types of forest by the study troops	186-189
6.2.11 Plant community parameter and food plant diversity in core habitat	190-201
6.2.12 Discussion	201-203
6.2.13 Reference	203-208
6.3. Nutritional ecology of <i>Macaca munzala</i>	
6.3.1 Introduction	209
6.3.2 Methods	210
6.3.3 Food plant selection	210
6.3.4 Nutritive value	210
6.3.5 Crude protein	210
6.3.6 Total carbohydrate	211
6.3.7 Crude fat	211
6.3.8 Determination of saponin content:	211
6.3.9 Determination of minerals (macro and micronutrients)	212
6.3. 10 Statistical analysis	212
6.3.11 Results	213
6.3.12 Major food plant	213
6.3.13 Nutritive value	215-218
6.3.14 Crude protein	219
6.3.15 Total carbohydrates	219
6.3.16 Crude fat	219
6.3.17 Saponin	219
6.3.18 Minerals	220
6.3. 19 Discussion	220
6.3.20 Broad leaved forest (KZ troop)	220-223

6.3.21 Mixed coniferous forest	224-228
6.3.20 References	229-231
CHAPTER 6.4 Acoustic characterization of alarm call of <i>Macaca munzala</i>	
6.4.2 Methods	232
6.4.3 Sound sampling	233
6.4.4 Spectrogram analysis	234
6.4.5 Spectral moment	234-235
6.4.6 Data analysis	236
6.4.7 Result	237
6.4.8 Vocalization behaviour	237
6.4.9 Frequency (Pitch) and Intensity	238-239
6.4.10 Structure of waveform	240
6.4.11 Formant and spectral moments	241
6.4.12 Discussion	244
6.4.13 References	245-249
Chapter VII. Comparative morphometric analysis of <i>Macaca munzala</i> and <i>Macaca assamensis pelops</i>	
7.1. Introduction	250
7.2. Method	251
7.2.1. Study site and animal	251
7.2.2. Climatic data	262
7.2.3. Phenotypic characterization	253
7.2.4. Tail length/head-body length measurements	253
7.2.5. Colour assessment	254
7.2.6. Data analysis	255
7.3. Results	256
7.3.1. Species specific trait	256-265
7.3.2. Penile morphology	265-266
7.3.3. Tail and body length variation (adult individual)	266-267
7.3.4. Coat colour	267-280
7.3.5. Facial skin colour	281-282
7.4. Discussion	283-285
7.5. Reference	286-289
Chapter VIII. Conclusion, recommendation and research scope	290-293
8.1. Conclusion and research scope	290-292
8.2. Recommendation	292-293
Publication Details	
Research publication	294
