<b>Chapter 1 General introduction of ionic liquid derived catalytic systems</b>	<b>1 1-1 22</b>
1.1 Ionic liquids: A brief overview as catalyst	
1.2 Ionic liquids derived catalysts: Basis and synthetic perspective	
1.2.1 Brönsted and Lewis acidity in ionic liquids	
1.2.2 Halometallates: Versatile approaches	
1.2.3 Supported ionic liquid phase: Advances in catalysis	
1.2.4 Low band gap materials: Supported photocatalysts	
1.2.5 Polyoxometalates: Heteropolyacid based catalysts	
1.2.6 Dicationic ionic liquids	
<b>Chapter 2 Exploration of multifaceted acidic 1, 3-disulfoimidazolium chlorometallates as heterogeneous catalysts for preparation of <math>\beta</math>-amino carbonyl compounds via Mannich-type reaction</b>	<b>2 1-2 60</b>
<b>Section 2A: Review of literature</b>	<b>2 1-2 21</b>
2A.1 Importance of chlorometallates as functional material	

2A.2	Literature review of chlorometallates of Fe(+3), Ni(+2) and Zn(+2) metal chloride	
2A.3	Uses of $\beta$ -amino carbonyl compounds	
2A.4	Review of ionic liquid mediated/catalyzed Mannich reaction	
	<b>Section 2B: Results and discussion</b>	<b>2 22-2 60</b>
2B.1	Synthesis and characterization of the catalyst	
2B.2	Catalytic study	
2B.3	Conclusion	
2B.4	Experimental section	
2B.5	Spectral data	
2B.6	NMR spectra of some selected compounds	
<b>Chapter 3</b>	<b>Studies on 1, 3-disulfoimidazolium chloronickellate immobilized HZSM-5 framework as visible-light induced heterogeneous photocatalyst for degradation of organic dye using advanced oxidation process</b>	<b>3 1-3 61</b>
	<b>Section 3A: Review of literature</b>	<b>3 1-3 22</b>
3A.1	Zeolites	
3A.2	ZSM-5: An insight into framework behaviour	
3A.3	ZSM-5 as better support	
3A.4	Ionic liquid immobilized ZSM-5	
3A.5	Review of photocatalytic degradation of dyes via advanced oxidation process (AOPs) involving ionic liquid systems	
3A.6	Use of ionic liquids in photocatalytic degradation of dyes	
	<b>Section 3B: Results and discussion</b>	<b>3 23-3 61</b>
3B.1	Characterizations of the composite materials	
3B.2	Photo catalytic performance study for advanced oxidative degradation of methylene blue	
3B.3	Conclusion	
3B.4	Experimental section	

<b>Chapter 4</b>	<b>Design of dual acidic 1, 3-disulfoimidazolium chlorozincate supported HZSM-5 materials and their catalytic use in the synthesis of indole derivatives</b>	<b>4 1-4 39</b>
	<b>Section 4A: Review of literature</b>	<b>4 1-4 12</b>
4A.1	Introduction	
4A.2	Biological importance of indole derivatives	
4A.3	Fischer indole synthesis	
4A.4	Ionic liquids in Fischer indole synthesis	
	<b>Section 4B: Results and discussion</b>	<b>4 13-4 39</b>
4B.1	Characterization of HZSM-5 supported ionic salts	
4B.2	Catalytic performance	
4B.3	Conclusion	
4B.4	Experimental section	
4B.5	Spectral data of indole derivatives ( <b>3a-3i</b> )	
4B.6	NMR spectra of some selected compounds	
<b>Chapter 5</b>	<b>A study on 2-methyl-1, 3-disulfoimidazolium polyoxometalate hybrid catalytic systems as safer alternative for sulfuric acid in nitration of aromatics</b>	<b>5 1-5 58</b>
	<b>Section 5A: Review of literature</b>	<b>5 1-5 24</b>
5A.1	Hybrid organic-inorganic polyoxometalates in catalysis	
5A.2	SO <sub>3</sub> H functionalized polyoxometalate ionic salts	
5A.3	Nitration of aromatic compounds involving ionic liquid systems	
	<b>Section 5B: Review of literature</b>	<b>5 25-5 58</b>
5B.1	Synthesis and characterization of organic-inorganic hybrid polyoxometalates	
5B.2	Catalytic activity	
5B.3	Conclusion	
5B.4	Experimental section	
5B.5	Spectral data	
5B.6	NMR spectra of selected compounds	

<b>Chapter 6</b>	<b>N, N, N', N'-tetrasulfopiperazinium dicationic ionic liquids as prominent acidic catalyst for one pot synthesis of 2-amino-4, 6-diaryl pyrimidines</b>	<b>6 1-6 48</b>
	<b>Section 6A: Review of literature</b>	<b>6 1-6 16</b>
6A.1	An insight into the behavior of monocationic and dicationic ionic liquids	
6A.2	Piperazine as a unique dicationic core	
6A.3	Pharmacological activities of pyrimidine derivatives	
6A.4	3, 4-dihydropyrimidin-2(1 <i>H</i> )-one (or thione) derivatives <i>via</i> Biginelli-like reaction protocols and involvement of ionic liquids as catalysts/medium	
6A.5	Strategies for conversion of Biginelli DHPMs to pyrimidines	
	<b>Section 6B: Results and discussion</b>	<b>6 17-6 48</b>
6B.1	Synthesis and characterization of N, N, N', N'-tetrasulfopiperazinium dicationic ionic liquids [TSPi][X] <sub>2</sub> with X = Cl, CF <sub>3</sub> SO <sub>3</sub> , TsO	
6B.2	Catalytic study	
6B.3	Conclusion	
6B.4	Experimental section	
6B.5	Spectral data of [TSPi][X] <sub>2</sub> , 2-amino pyrimidine derivatives ( <b>2a-2j</b> ) and two Biginelli dihydropyrimidone derivatives ( <b>1a &amp; 1i</b> )	
6B.6	NMR spectra of some selected compounds	
<b>Chapter 7</b>	<b>Summary and future scopes</b>	<b>7 1-7 4</b>
7.1	Summary of the present work	
7.2	Future scopes of the present work	
<b>Annexure I</b>	List of publications	<b>S 1</b>
<b>Annexure II</b>	List of conferences and workshops	<b>S 2-S 3</b>
