<b>ABSTRACT</b>	<b>viii</b>
<b>List of Figures</b>	<b>xxix</b>
<b>List of Tables</b>	<b>xxxii</b>
<b>List of Abbreviations</b>	<b>xxxiv</b>
<b>1 INTRODUCTION</b>	<b>1</b>
1.1 A brief historical background of Neutrinos . . . . .	3
1.2 Current status of neutrinos . . . . .	5
1.3 The Standard Model (SM) . . . . .	9
1.3.1 The electroweak sector . . . . .	10
1.3.2 Spontaneous symmetry breaking and Higgs mechanism . . . . .	12
1.3.3 Fermionic weak interactions and fermion masses . . . . .	14
1.4 Limitations of the Standard Model . . . . .	15
1.4.1 Theoretical . . . . .	15
1.4.2 Observational . . . . .	17
1.5 Beyond Standard Model (BSM) . . . . .	18
1.5.1 Neutrino Mass . . . . .	18
1.5.1.1 Neutrino Oscillation . . . . .	19
1.5.1.2 Dirac and Majorana mass term . . . . .	20
1.5.1.3 Seesaw Mechanism . . . . .	22
1.5.2 Left-Right Symmetric Model (LRSM) . . . . .	25
1.5.2.1 Particle contents of LRSM and Electroweak Symmetry breaking . . . . .	27

1.5.2.2	Spontaneous Symmetry Breaking in LRSM . . . . .	29
1.5.2.3	Masses in LRSM, Fermion and Gauge boson mass . . . . .	30
1.5.3	Neutrinoless double beta decay . . . . .	32
1.5.3.1	Neutrinoless double beta decay theory . . . . .	33
1.5.3.2	Neutrinoless double beta decay in LRSM . . . . .	36
1.5.4	Baryon Asymmetry of the Universe . . . . .	38
1.5.4.1	Leptogenesis . . . . .	39
1.5.4.2	Resonant Leptogenesis . . . . .	40
1.5.5	Lepton Flavor Violation . . . . .	42
1.6	Flavor symmetry in particle physics . . . . .	45

**2 Neutrinoless double beta decay and lepton flavor violation in left-right symmetric model 63**

2.1	Introduction . . . . .	64
2.2	Left-right symmetric model and neutrino mass . . . . .	69
2.3	$0\nu\beta\beta$ decay in LRSM . . . . .	71
2.4	Lepton Flavor Violation (LFV) . . . . .	73
2.5	Numerical analysis and results . . . . .	75
2.5.1	Standard light neutrino contribution . . . . .	75
2.5.2	New physics contribution to NDBD considering perturbation in type II seesaw. . . . .	77
2.5.3	New physics contribution to NDBD considering perturbation in type I seesaw. . . . .	79
2.5.4	Correlating LFV with lightest neutrino mass and $\theta_{23}$ . . . . .	80
2.6	Conclusion . . . . .	86

**3 Connecting lepton number violation, lepton flavor violation and baryogenesis in left-right symmetric model 97**

3.1	Introduction . . . . .	97
3.2	Resonant Leptogenesis, NDBD and LFV in TeV scale LRSM . . . . .	101
3.3	Numerical analysis and results . . . . .	104
3.3.1	Baryogenesis via Leptogenesis . . . . .	105

3.3.2	NDBD from heavy RH neutrino, gauge boson mixing and light-heavy neutrino mixing . . . . .	107
3.3.3	Lepton Flavor Violation . . . . .	109
3.4	Discussion and conclusion . . . . .	117
<b>4</b>	<b>Lepton number violation and baryogenesis in type I + type II seesaw</b>	<b>127</b>
4.1	Introduction . . . . .	127
4.2	Resonant Leptogenesis (RL) and NDBD in TeV scale LRSM . . . . .	130
4.3	Numerical Analysis and Results . . . . .	132
4.3.1	Baryogenesis via Leptogenesis . . . . .	133
4.3.2	NDBD from heavy RH neutrino and scalar triplet contribution . . . .	138
4.4	Discussion and Conclusion . . . . .	146
<b>5</b>	<b>Two texture zero neutrino mass in left-right symmetric model with <math>Z_8 \times Z_2</math></b>	<b>153</b>
5.1	Introduction . . . . .	153
5.2	Two zero texture and tri-maximal mixing . . . . .	157
5.3	Symmetry realizations in LRSM . . . . .	158
5.4	Neutrinoless double beta decay and lepton flavor violation in LRSM. . . . .	164
5.5	Numerical analysis and results . . . . .	166
5.5.1	Collider signatures . . . . .	181
5.6	Conclusion . . . . .	184
<b>6</b>	<b>Texture zeros in lepton mass matrices of minimal left-right symmetric model</b>	<b>193</b>
6.1	Introduction . . . . .	194
6.2	Texture Zeros in Lepton Mass Matrices of LRSM . . . . .	196
6.3	Neutrinoless Double Beta Decay in LRSM . . . . .	203
6.4	Charged Lepton Flavor Violation in LRSM . . . . .	206
6.5	Numerical Analysis and Results . . . . .	206
6.6	Discussion and Conclusion . . . . .	225
<b>7</b>	<b>CONCLUSION</b>	<b>235</b>
7.1	Chapter 2 . . . . .	235

7.2 Chapter 3 . . . . . 236

7.3 Chapter 4 . . . . . 237

7.4 Chapter 5 . . . . . 238

7.5 Chapter 6 . . . . . 240

7.6 Future Prospects . . . . . 241

**A APPENDIX 243**

A.1 Elements of the type II Seesaw mass matrix (case B) and type I  
Seesaw mass matrix (Case C): . . . . . 243

A.2 Determination of  $M_D$ : . . . . . 245
