

CONTENTS

CONTENTS	Page No.
List of Tables	i
List of Figures	iv
List of Symbols and Abbreviations	ix
Chapter I: Introduction and Review of Literature	1-44
1.1. Basic introduction	2
1.2. Introduction to Cytochrome P450	4
1.2.1. Microbial Cytochrome P450	5
1.2.2. Structure and mechanism of reaction of CYP450	6
1.2.3. Hydrocarbon hydroxylation by CYP450	9
1.3. Enzyme Immobilisation	10
1.3.1. Immobilisation of CYP450s	11
1.4. Introduction to Biosensors	13
1.4.1. Basic Components of a Biosensor	14
1.4.2. Electrochemical Biosensor	17
1.4.3. Potentiometric Biosensor and Ion Sensitive Field Effect Transistor (ISFET)	18
1.5. Cytochrome P450 in Biosensors	20
1.6. Present scenario of Hydrocarbon Detection	24
1.7. Aim and Objectives of the study	25
Bibliography	26
Chapter II:	45-70
2.1.1. Introduction	46
2.1.2. Objectives	48
2.2. Materials and Methodologies	48
2.2.1. Materials used	48
2.2.1.1. Chemicals used	48

2.2.1.2.	Instruments used	49
2.2.2.	Methodologies	49
2.2.2.1.	Optimisation of the fabricated carbon monoxide (CO) production unit	49
2.2.2.2.	Collection of soil samples and serial dilution	50
2.2.2.3.	Serial dilution method for isolation of hydrocarbon degrading bacteria	50
2.2.2.4.	Screening of hydrocarbon-degrading bacteria for cytochrome p450 using CO diffraction spectra:	51
2.2.2.4.1.	Growth and Induction of the bacteria	51
2.2.2.4.2.	Reduction of heme by sodium dithionite.	51
2.2.2.4.3.	Measurement of the CO-Fe (II) versus Fe (II) difference spectra and data processing.	52
2.2.2.5.	Determination of growth curve of screened bacteria	52
2.2.2.6.	Production of CYP450 of screened bacteria	53
2.2.2.7.	Preparation of spheroplast for storage	54
2.2.2.8.	Identification of strains-TM14001 and TM14023 using Colony PCR	54
2.2.2.9.	Optimisation study for <i>Bacillus stratosphericus</i>	55
2.3.	Results	56-66
2.4.	Discussions	66-67
2.5.	Conclusions	67-68
	Bibliography	68-70
Chapter III: Partial purification and characterisation of Cytochrome P450		71-92
3.1.	Introduction	72
3.2.	Objectives	72
3.3.	Materials and Methodologies	72
3.3.1.	Materials used	72
3.3.1.1.	Chemicals used	72

3.3.1.2. Instruments used	73
3.3.2. Methodologies	73
3.3.2.1. Cells disruption using Sonication followed by Ultracentrifugation	73
3.3.2.2. Protein quantification by Bradford's assay	74
3.3.2.3. Partial purification of the CYP450 components	75
3.3.2.4. Sample preparation for MALDI-MS	76
3.3.2.5. Trypsin digestion of Protein sample	76
3.3.2.6. Analysis of Data post trypsin digestion	77
3.4. Results	77-86
3.5. Discussions	86-88
3.6. Conclusions	88-89
Bibliography	89-92
Chapter IV:	93-116
4.1. Introduction	94
4.1.1. Working principle of this device	94
4.2. Objectives	96
4.3. Materials and Methodologies	96
4.3.1. Materials used	96
4.3.1.1. Chemicals used	96
4.3.1.2. Instruments used	96-97
4.3.2. Methodologies	97
4.3.2.1. Device Fabrication	97
4.3.2.2. Circuit design	100
4.3.2.3. Preparation of the Bioreceptor	101
4.3.2.4. Immobilisation of the enzyme	102
4.4. Results	103-112
4.5. Discussions	112-114
4.6. Conclusions	114
Bibliography	115-116

Chapter V:	117-137
5.1. Introduction	118-120
5.2. Objectives	120
5.3. Materials and Methodologies	120
5.3.1. Materials used	120
5.3.1.1. Chemicals used	120
5.3.1.2. Instruments used	121
5.3.1.3. The Bioreceptor	122
5.3.1.4. ISFET, Reference electrode and the circuit	122
5.3.2. Methodologies	123
5.3.2.1. Preparation of polyaphrons and Enzyme immobilisation	123
5.4. Results	123-132
5.5. Discussions	132-134
5.6. Conclusions	134-135
Bibliography	135-137
Chapter VI: Conclusions and Future Directions	138-142
Publications	143-146
Addendum	147-152
