Abstract	i-iv
Table of Contents	v
List of Tables	x
List of Figures	xi
Nomenclature	xiv
Chapter 1: Introduction	1-31
1.1 Dominancy of solid fuel for cooking	1
1.2 Research and Development efforts to improve thermal efficiency of cook stove	3
1.2.1 Ignition	3
1.2.2 Air Flow	3
1.2.3 Stove materials	4
1.3 Government initiatives to disseminate efficient cook stoves	5
1.4 Global electricity access	5
1.4.1 Status of electrification	6
1.5 Technologies to convert heat into electricity	9
1.5.1 Thermoelectric Generator: Principle of operation	10
1.5.2 Power output relation of TEG	14
1.6 Prospect of integration of TEG with biomass cook stove	16
1.7 Prospect of integrating TEG with fixed clay biomass cook stove	17
1.8 Objectives of the research	19
1.9 Organization of the thesis	19
References	21
Chapter 2: Review of Literature	32-59
2.1 Introduction	32
2.2 Application of TEG in IC engine driven vehicle	33
2.3 Application of TEG in waste heat recovery in Industries	37
2.4 Application of TEG in other transportation vehicles	37
2.5 Hybrid TEG-Renewable energy	38

2.6	Application of TEG in biomass cook stoves	39
2.6.1	Heat Collector	40
2.6.2	Heat Sink	41
2.6.3	Selection of TEG module	43
2.6.4	Performance testing of TEG integrated cook stove	44
2.6.5	Economics of TEG integrated cook stove	47
2.6.5.1	Economic analysis of cook stoves	48
2.7	Summary	50
	References	51

Chapter 3: TEG integrated fixed clay stove	60-99
---	--------------

3.1	Introduction	60
3.2	Conceptualization of TIFICS	61
3.3	Procedure of developing and performance testing of TIFICS	61
3.4	Selection of fixed clay cook stove	63
3.5	Thermo-physical properties of stove material	65
3.6	Temperature distribution inside combustion chamber of fixed clay stove	66
3.7	Heat transfer estimation inside CC of the stove	68
3.7.1	Heat transfer from fuel bed to CC inner wall	69
3.7.2	Heat transfer from flame to CC inner wall	69
3.7.3	Heat transfer from flue gas to CC inner wall	70
3.7.4	Heat transfer from combustion chamber inner wall	71
3.7.5	Heat absorbed by the CC inner wall	73
3.8	Development of TEG assembly	73
3.8.1	Heat collector plate	73
3.8.2	TEG module	74
3.8.3	Heat Sink	74
3.9	Integration of TEG assembly with fixed clay stove	75
3.10	Experimental set up for performance testing of TIFICS	75
3.11	Results and Discussion	77
3.11.1	Thermo-physical properties of stove material	77

3.11.2	Temperature distribution inside the combustion chamber	77
3.11.3	Heat transfer inside combustion chamber	78
3.11.4	Heat collector plate	79
3.11.5	TEG module for TEG assembly	81
3.11.6	Heat Sink	82
3.11.7	Assembling heat collector, TEG module and heat sink	84
3.11.8	Integration of TEG assembly with improved fixed clay cook stove, <i>Sukhad</i>	85
3.11.9	Experimental test results and discussion of TIFICS	86
3.11.9.1	Maximum achievable temperature difference for operation of TIFICS	86
3.11.9.2	Performance of TIFICS	87
3.12	Summary	93
	References	95

Chapter 4 Field testing of TIFICS	100-135
--	----------------

4.1	Introduction	100
4.2	Field testing procedure of TIFICS	101
4.3	Selection of rural area	102
4.4	Domestic energy use in cooking and lighting during pre-deployment phase	103
4.5	Criteria for selection of households	104
4.6	Installation of TIFICS and training of users	104
4.7	TIFICS field testing	105
4.7.1	Battery charging circuitry	105
4.7.2	Performance testing and devices for data recording	106
4.7.3	Firewood characterization	107
4.8	Impact analysis of TIFICS	107
4.9	Results and Discussion	108
4.9.1	Domestic energy use pattern in Dikarijan village	108
4.9.2	Selection of households and installation of TIFICS	112
4.9.3	TIFICS field test: stove usage	113

4.9.4	TIFICS performance	113
4.9.5	Electrical energy supply and demand	122
4.10	Issues faced during field testing	124
4.11	Impact of TIFICS on users	127
4.12	Summary	131
	References	132

Chapter 5: Economic benefits and TIFICS promotion policy	136-158
---	----------------

5.1	Introduction	136
5.2	Economic analysis	137
5.2.1	Levelized cost of cooking meal (LCCM)	137
5.2.2	Potential fuel savings through introduction of TIFICS	140
5.2.3	Policy for TIFICS dissemination	141
5.3	Results and Discussion	141
5.3.1	Levelized Cost of cooking meal (LCCM)	141
5.3.2	Potential savings due to introduction of TIFICS	143
5.4	Policy support desired for dissemination of TIFICS	145
5.4.1	Promotion of cook stove with provision of waste heat recovery and generation of electricity	146
5.4.2	Business plan for promotion of TIFICS	147
5.4.3	Technology compatibility with prevailing customs	148
5.4.4	User participation for TIFICS promotion	149
5.4.5	Prospect to include TIFICS with schemes of rural development	150
5.5	Summary	151
	References	152

Chapter 6: Summary and Conclusions	159-166
---	----------------

6.1	TEG integrated fixed clay stove	159
6.2	Field Testing of TIFICS	161
6.3	Economic benefits and TIFICS promotion policy	164
6.4	Conclusions	165
6.5	Practical usefulness of TIFICS	165
6.6	Suggestions for future work	165
