Acknowledgment

First and foremost, I offer my deepest gratitude to my supervisor, Dr. Swarnajyoti Patra, who introduced me to the research. Without his constant guidance, support, monitoring, inspiring advises, systematic approaches, thoughtful discussion and sensible review, this research could not have reached its completion.

I am also deeply indebted to Dr. L Bruzzone from University of Trento, Italy, whose wisdom, advises and critical review smoothened the path of my Ph.D. I would also like to express my appreciation to the members of my doctoral committee, Dr. S. M. Hazarika, Dr. R. Sarmah, Dr. B. Borah, the head of both the department and the doctoral research committee, Dr N. Sarma and all the faculty members of the department of computer science and engineering, Tezpur University, for their constructive comments on my thesis.

I am thankful to Dr. M. A. Dutta for introducing me to the Ph.D position at Tezpur University, TUEE committee 2015 for accepting me as a Ph.D student, department and university administration for proving me necessary facility and environment for completing my research and the University Grant Commission, Government of India for providing me the financial support in form of UGC NET-JRF fellowship. I would also like to thank Dr. S Prashad from University of Houston, USA for proving the University of Houston hyperspectral data set. I would also like to thank all the anonymous reviewers of the published works and the thesis for their constructive comments.

My deepest thanks goes to my colleagues, Arundhati Das, Piyali Sen, Rupam Bhattacharyya, Mampi Devi, Alak Roy, Upasana Talukdar, Alexy Bhowmick, Deena Hijam, Carynthia Kharkongor, Yumnam Nirmal, Nazrul Hoque, Shobhanjana Kalita, Pathajit Borah, Upasana Sarmah, Pooja Sharma, Nilakshi Devi, Rup Kumar Deka and many others with whom I had the opportunity to have intellectual interaction, received their encouragement and support throughout the Ph.D journey and spent many unforgettable times together.

I offer my special thanks to my parents, my elder brother and sister-in-law for their love, support, encouragement, and belief in me and education. I am indebted to my little nieces, Bhavya and Bhavna. Talking to them even from a distance have been a total refreshment.

Last but not least, I would like to thank all my teachers throughout my school and university for their contribution in my life. I would like to thank the almighty lord for the outpouring of positive energy in my life. I would also like to thank the scientific community from the world to let me stand on their shoulders. Finally, I offer my gratefulness to all who are directly or indirectly involved in this thesis work.

Kaushal Bhardwaj
