Abstract	i-iii
Declaration by the Candidate	iv
Certificate of the Supervisor	v
Acknowledgement	vi-vii
Table of Contents	viii-xiii
List of Tables	xiv
List of Figures	xv-xvi
List of Abbreviations	xvii-xix
Chapter 1: Introduction	1-18
1.1. Cancer	2
1.2. Breast cancer	3
1.3. Metastasis of cancer	5
1.4. Cancer treatment approaches and risks	6
1.5. Medicinal plants in drug discovery	8
1.6. Extraction of phytochemicals	9
1.7. Objectives	9
1.8. Bibliography	12
Chapter 2: Review of literature	19-62
2.1. Molecular basis of breast cancer	20
2.2. Hormone-dependent Breast cancer	21
2.3. Mechanisms of cancer cell death	22
2.3.1. Intrinsic apoptosis	23
2.3.2. Extrinsic apoptosis	25
2.3.3. Necroptosis	25
2.3.4. Transition (MPT)-driven necrosis	26

2.3.5. Ferroptosis	26
2.3.6. Pyroptosis	26
2.3.7. Parthanatos	27
2.3.8. Entosis	27
2.3.9. NETosis	27
2.3.10. Lysosome-dependent cell death	27
2.3.11. Autophagy-dependent cell death	28
2.3.12. Immunogenic cell death	28
2.4. Regulation of cell cycle and apoptosis	28
2.5. Regulation of metastasis	29
2.6. Targets of breast cancer treatment	31
2.7. Medicinal plants as an anticancer agent	32
2.8. <i>Ricinus communis</i> L	34
2.9. <i>Amorphophallus paeoniifolius</i> (Dennst.) Nicolson	35
2.10. Bibliography	36
Chapter 3: Screening of extracts from selected medicinal plants based on their cytotoxic activity against breast cancer cell lines	63-87
3.1. Introduction	64
3.2. Materials and methods	64-70
3.2.1. Cell lines and reagents	64
3.2.2. Preparation of polyphenol solutions	64
3.2.3. Preparation of plant extracts	65
3.2.4. Cell culture	66
3.2.5. MTT assay for cell viability determination	66
3.2.6. In vitro free radical scavenging activity	66
3.2.6.1. DPPH radical scavenging assay	66

3.2.6.2. Hydroxyl radical scavenging assay	67
3.2.6.3. ABTS radical scavenging assay	67
3.2.6.4. Nitric oxide radical scavenging assay	67
3.2.7. Total antioxidant activity (FRAP)	68
3.2.8. Determination of phytochemicals in RCFE and APTE	68
3.3. Results	70-78
3.3.1. Establishment of cytotoxicity (MTT) assay method using commercial polyphenols	70
3.3.2. Cytotoxic activity of plant extracts	73
3.3.3. RCFE and APTE are non-toxic to normal cells	75
3.3.4. In vitro free radical scavenging activity	76
3.3.5. Phytochemicals and bioactive compounds in RCFE and APTE	78
3.4. Discussion	79
3.5. Bibliography	81
Chapter 4: Anticancer activity of the fruit extract of Ricinus communis L. (RCFE) and identification of major compounds	88-132
4.1. Introduction	89
4.2. Classification of the plant	89
4.3. Materials and methods	90-95
4.3.1. Cell lines and reagents	90
4.3.2. Preparation of extracts	90
4.3.3. Cell Culture	90
4.3.4. Wound healing migration assay	90
4.3.5. Collagen adhesion assay	91
4.3.6. Matrigel invasion assay	91

4.3.7. DNA fragmentation assay	91
4.3.8. Annexin V/PI apoptosis assay	91
4.3.9. Flow cytometer analysis for apoptosis	92
4.3.10. Western blot analysis	92
4.3.11. Syngeneic mouse model to study inhibition of tumor development by RCFE in-vivo	92
4.3.12. Fractionation of the extract	93
4.3.13. Cytotoxicity assessment by MTT	94
4.3.14. Fingerprint analysis of <i>R. Communis</i> L. fruit extracts	94
4.3.15. Biological activity of pure compounds	95
4.3.16. Statistical analysis	95
4.4. Results	95-119
4.4.1. RCFE inhibits migration of MCF-7 and MDA-MB-231 cells	95
4.4.2. Effect of RCFE on adhesion of MCF-7 and MDA-MB-231 to collagen IV	96
4.4.3. RCFE retards invasion of MCF-7 and MDA-MB-231 cells to matrigel	97
4.4.4. RCFE down-regulates expression of MMPs in MCF-7 and MDA-MB-231 cells	98
4.4.5. RCFE induced apoptosis in MCF-7 and MDA-MB-231 cells	99
4.4.6. RCFE inhibits phosphorylation of STAT3	104
4.4.7. RCFE inhibits tumor growth in a syngeneic mouse model	105
4.4.8. Effect of RCFE on other cancer cells	107
4.4.9. Successive fractionation of RCFE and identification of bioactive compounds	110
4.4.10. The anticancer activity of pure compounds	115

4.5. Discussion	119
4.6. Bibliography	125
Chapter 5: Mechanism of anticancer activity of edible tuber Amorphophallus paeoniifolius (APTE) against breast cancer cells	133-158
5.1. Introduction	134
5.2. Classification of the plant	134
5.3. Material and methods	135-137
5.3.1. Cell lines and reagents	135
5.3.2. Preparation of extracts	135
5.3.3. Cell culture	135
5.3.4. Migration assay	135
5.3.5. Adhesion assay	135
5.3.6. Invasion assay	135
5.3.7. DNA fragmentation assay	135
5.3.8. Annexin V-Cy3 assay	136
5.3.9. Western blot analysis	136
5.3.10. Fractionation of the extract	136
5.3.11. Cytotoxicity assay using MTT	136
5.3.12. Identification of bioactive compounds by LCMS	137
5.3.13. Statistical analysis	137
5.4. Results	137-146
5.4.1. APTE inhibits migration of MCF-7 and MDA-MB-231 cells	137
5.4.2. Adhesion of MDA-MB-231 to collagen IV is hindered by APTE	138
5.4.3. Invasion of MDA-MB-231 cells is reduced by APTE	139
5.4.4. APTE induced DNA degradation in MCF-7 and MDA-MB-	140

231 cells	
5.4.5. Induction of apoptosis by APTE	141
5.4.6. Western blot analysis of apoptosis inducing proteins	142
5.4.7. Bioactive compounds in APTE	144
5.5. Discussion	147
5.6. Bibliography	151
Chapter 6: Conclusion and future prospects	159-163
6.1. Conclusion	160
6.2. Future prospects	162
Appendices
