<b>Abstract</b>	<b>i</b>
<b>Declaration by the candidate</b>	<b>iii</b>
<b>Certificate of the supervisor</b>	<b>iv</b>
<b>Acknowledgements</b>	<b>v</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The evolution of coding theory . . . . .	1
1.2 Integer codes . . . . .	7
1.3 Some specific error patterns . . . . .	9
1.4 Previous results on integer and linear codes . . . . .	13
1.5 Thesis layout . . . . .	23
<b>2 Asymmetric CT-Burst Correcting Integer Codes</b>	<b>27</b>
2.1 Overview . . . . .	27
2.2 Construction of codes . . . . .	28
2.2.1 Encoding procedure . . . . .	28
2.2.2 Decoding procedure . . . . .	30
2.3 Implementation . . . . .	34
2.4 Comparison . . . . .	36
2.5 Probability and BER . . . . .	37
2.6 Conclusion . . . . .	41
<b>3 Low-Density and High-Density Asymmetric CT-Burst Correcting Integer Codes</b>	<b>43</b>
3.1 Overview . . . . .	43
3.2 Construction of codes . . . . .	44
3.2.1 Encoding procedure . . . . .	44
3.2.2 Decoding procedure . . . . .	47
3.3 Evaluation and comparison . . . . .	52
3.3.1 Implementation and comparison . . . . .	52
3.3.2 The probability of erroneous decoding . . . . .	56
3.4 Conclusion . . . . .	60

<b>4 Unidirectional Solid Burst Correcting Integer Codes</b>	<b>63</b>
4.1 Overview . . . . .	63
4.2 Construction of codes . . . . .	64
4.2.1 Encoding procedure . . . . .	65
4.2.2 Decoding procedure . . . . .	67
4.3 Evaluation and comparison . . . . .	71
4.3.1 Implementation and comparison . . . . .	71
4.3.2 Probability and BER . . . . .	76
4.4 Conclusion . . . . .	78
<b>5 Asymmetric Solid Burst Correcting Integer Codes</b>	<b>80</b>
5.1 Overview . . . . .	80
5.2 Construction of codes . . . . .	81
5.2.1 Encoding procedure . . . . .	81
5.2.2 Decoding procedure . . . . .	84
5.3 Undetected errors, erroneous decoding probability and comparison . . . . .	92
5.3.1 Undetected asymmetric solid bursts . . . . .	93
5.3.2 Erroneous decoding probability . . . . .	94
5.3.3 Comparison . . . . .	96
5.4 Conclusion . . . . .	98
<b>6 Asymmetric Burst Correcting Integer Codes</b>	<b>100</b>
6.1 Overview . . . . .	100
6.2 Construction of codes . . . . .	100
6.2.1 Encoding procedure . . . . .	101
6.2.2 Decoding procedure . . . . .	104
6.3 Comparison and probability . . . . .	109
6.3.1 Comparison . . . . .	110
6.3.2 Probability of erroneous decoding and BER . . . . .	112
6.4 Conclusion . . . . .	115
<b>7 Probability of Erroneous Decoding for Integer Codes Correcting Asymmetric and Symmetric Errors</b>	<b>118</b>
7.1 Overview . . . . .	118
7.2 Probability and BER . . . . .	119
7.3 Conclusion . . . . .	130
<b>A Python program for integer <math>(CT_lB)_b</math> codes</b>	<b>131</b>
<b>B Python program for integer <math>LACTB_{(d/l,b)C}</math> codes</b>	<b>135</b>
<b>C Python program for integer <math>HACTB_{(h/l,b)C}</math> codes</b>	<b>138</b>
<b>D Python program for integer <math>(U_lSB)_b</math> codes</b>	<b>141</b>
<b>E Python program for integer <math>(A_lSB)_b</math> codes</b>	<b>143</b>
<b>F Python program for integer <math>(B_lAEC)_b</math> codes</b>	<b>148</b>
